

# COMPACT III

WORKSPACE AND STORAGE FURNISHINGS

# LISTA

## YOUR PARTNER FOR MORE THAN 70 YEARS

For over 70 years, LISTA has been providing efficient and organised workspace and storage solutions, the most popular of which are now showcased in the new LISTA Compact. For the first time, we have selected a range of the most popular solutions in each product group. In addition, each product can still be configured as per your requirements and ordered individually. With all the benefits LISTA offers now even more clearly presented.

### LISTA: Benefits at a glance

- + Comprehensive range**  
from A for access control to W for workstation systems
- + The system concept**  
all products can be freely combined
- + Bespoke solutions**  
for customers with specific needs
- + Maximum flexibility**  
with a choice of colours, configuration options and more
- + A wide range of services**  
such as training, assembly, marking, etc.
- + Expert planning**  
with our LISTA Draw visualisation software
- + 10-year guarantee**  
unique in the industry
- + Worldwide distribution and service network**  
for unlimited customer service
- + First-class references**  
from more than 100,000 prestigious companies worldwide

# WELCOME TO THE NO. 1

**LISTA is the recognised market leader in Europe for workspace and storage solutions.** We have set the standard and our name has become synonymous with drawer cabinets, workstations and shelving systems can be freely combined to make your workspace work. Our products are used worldwide by over 100,000 satisfied customers in a variety of different industries.

# A SYSTEM FOR YOUR SUCCESS

The LISTA standard unit is the base of a system in which multiple components can be combined and matched. Cabinets, workstations and workbenches, or shelving systems can be freely configured, independently partitioned, intelligently labelled and protected with access control. All products are available in almost any colour. LISTA provides a system to organise your business successfully.

# A SOLUTION TO MATCH YOUR NEEDS

Products made by LISTA have set standards by reaching far beyond standard applications. We are committed to fulfilling customer requirements with bespoke solutions regardless of project size or industry. Our universal system and vast planning expertise will turn your expectations into reality.

# A SOUND INVESTMENT

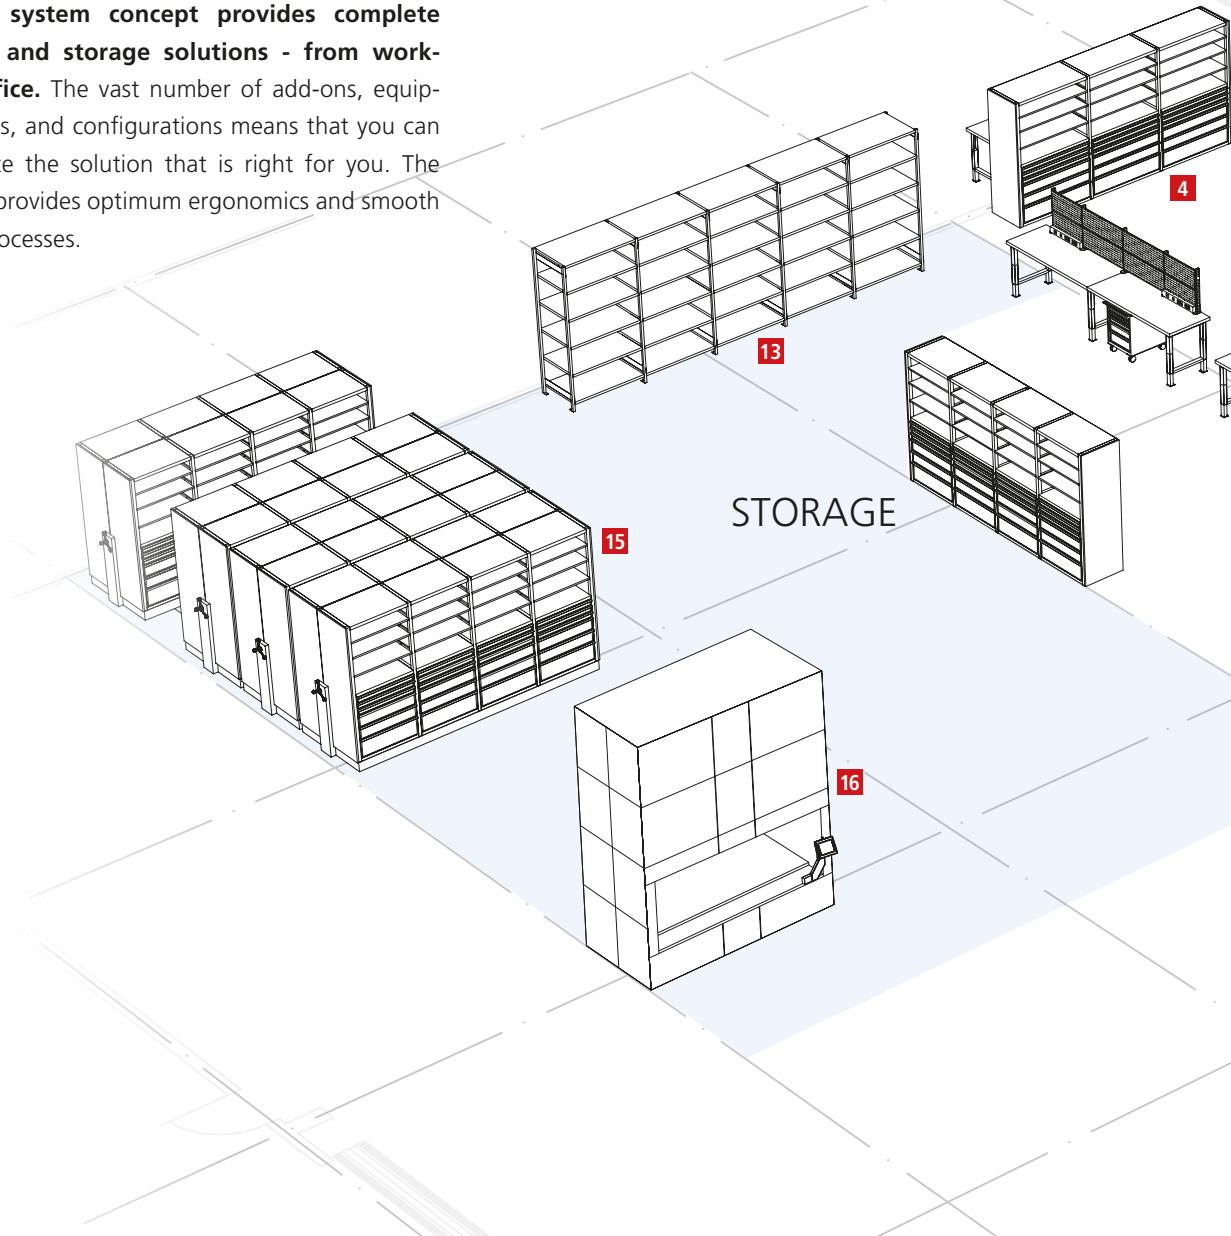

By opting for LISTA you place your trust in durability and continuity. Our unique 10-year product and re-ordering guarantee reflects our corporate philosophy. We process only the highest quality materials. Our products are made in Switzerland or Germany and shipped to customers through a broad distribution and service network.

# EVERYTHING FITS

The LISTA system concept provides complete workspace and storage solutions - from workshop to office. The vast number of add-ons, equipment options, and configurations means that you can always create the solution that is right for you. The system also provides optimum ergonomics and smooth workflow processes.

**16** Dynamic systems see separate brochure

# THE CHOICE IS YOURS

**LISTA stands for bespoke system solutions to meet your needs.** Size, equipment, locking system, colour or drawer partitions: every detail of every element can be optimised and adapted to meet your individual requirements to ensure the solution is fit for purpose. We will be pleased to advise you on the best configuration via our helpline or to assist you personally from analysis and project planning to fitting and beyond.

Because LISTA offers expert advice and service, you can get everything you need for a truly efficient workplace from a single supplier and we can meet any challenge, true to our motto: making work-space work.

# ORGANISATION MADE TO MEASURE

**From drawer cabinets to individual workstations, the entire LISTA system is based on a standard measurement.** A LISTA unit is 17 mm and this ensures that all elements fit together seamlessly. This enables you to freely combine any LISTA product, to replace or add on elements or to reconfigure your system any way you like.

The LISTA unit gives you maximum creative freedom, regardless of whether you want to store industrial tools or maintain an orderly and secure stock of medicines in a hospital. The standard grid also ensures that partition materials give you the highest possible degree of order and organisation and brings the additional benefits of workflow and efficiency.

## **LISTA partition material**

see p. 204

# COLOURFUL SOLUTIONS

**Twelve standard colours, six colour combinations, all other colours available.** Whether a workbench or drawer cabinet in red, green or violet: LISTA can supply any product, in any colour and colour combination on request. This means that you can design your own individual system with absolute flexibility. All options are possible, from different colours for individual work areas to storage and workspace furnishing in corporate colours.

In addition to classic standard colours like pale blue, pale grey, pure white or black, you can choose from 12 other predefined colours or simply specify the colours you want. And you can order housings and drawers in different colours. Because when we say flexible, we mean it.

**All standard colours**  
see fold-out page at end

# SECURITY INCLUDED

**From standard locking systems with replaceable cylinders to fully electronic access control systems: LISTA gives you the choice.** Four intelligent levels of security reliably ensure that only authorised personnel have access to the inventory. The new generation of LISTA locking systems now offers security with even more flexibility and ease of use – with an RFID card, for example.

LISTA offers the utmost compatibility; many existing cabinets can be retrofitted easily with modern technologies. With LISTA Electronic Control you can not only control access to the whole cabinet, individual drawers or the drawer compartments specially developed for this system, but use all the various system types together in a single cabinet – just as required.

## Electronic access control

- Modular access control system
  - Simple electronically controlled access to cabinets, drawers or compartments (LISTA Cabinet Control, LISTA Drawer Control or LISTA Parts Control)
- » see p. 56

## KEY Lock

- standard locking system with replaceable cylinders including two keys with key number
- easily adapted to existing locking systems
- can be used as master key locking system (max. 100 cylinders) or as separate or combined locking system

## CODE Lock

- Locking system with 10 digits for 4- to 6-digit codes, up to 100 codes
- direct access without a key
- code management with master code or LISTA Access Software
- log file of last 50 events

## RFID Lock

- all functions such as CODE Lock
- complete user/cabinet management with LISTA Access Software via USB
- use RFID badge, RFID card or code
- users can be added and removed easily using a master card, RFID badge, RFID card or LISTA Access Software
- free contact for external systems

## AUTO Lock

- all functions such as RFID Lock
- locks the cabinet automatically after a preset time
- opens and locks the cabinet automatically without manual operation
- access and locked time management with LISTA Access Software via USB

## LOCKING SYSTEMS

# STATE-OF-THE-ART SECURITY

The latest generation of LISTA locking systems combines easy operation/access with maximum flexibility. As such, our RFID-operated electronic locking systems are now even more variable and easier to use. The different systems can be freely combined to create a locking system that perfectly suits you and your requirements. We are happy to advise you.

- + Modular locking system**  
perfectly adapted to your needs
- + Easy to use**  
directly on the lock  
(in all variants)
- + Optimal control and management**  
via software with standard USB cable connected to the USB front port on the lock  
(for types .C, .F or .A)
- + Capacitive keypad**  
impervious to wear and easy to clean thanks to PCT technology
- + Mobile access**  
via RFID badge and RFID card
- + Easy energy supply**  
via mains adaptor or batteries for easy replacement on the front of the lock
- + Optional retrofitting**  
for existing cabinets

# OVERVIEW OF LISTA ACCESS SOLUTIONS

## KEY LOCK PROVEN STANDARD LOCKING SYSTEM

KEY Lock, our standard locking system with replaceable cylinders.

- **Manual opening/locking** with key
- Simultaneously lockable for multiple, as well as different, products with only one key or separately lockable with several keys
- Key availability guaranteed for years

## CODE LOCK THE MODERN SOLUTION WITH NUMBER COMBINATION

When locking with CODE Lock, the key is replaced by a number combination. A simple four to six-digit code is all that is needed to open the product.

- **Manual opening/locking** with number code
- Lock readout and programming with LISTA Access Software (option)

## RFID LOCK READY FOR THE FUTURE: THE SOLUTION WITH RFID BADGE

In addition to the CODE Lock, the LISTA RFID Lock enables opening and locking via standard radio-frequency identification (RFID). It consists of a transponder in the lock and standard mobile RFID badges/cards/tags.

- **Manual opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Lock readout and programming with LISTA Access Software (option)

## AUTO LOCK THE ULTIMATE SOLUTION: AUTOMATIC OPENING AND LOCKING

The LISTA AUTO Lock features the same functionality as our RFID Lock, however opening and locking take place automatically. With LISTA Access Software (option), time profiles can also be programmed in the lock or on the user for time-limited access for increased security.

- **Automatic opening/locking** via RFID badge or number code
- Most standard RFID badges/cards/tags can be used
- Locks automatically after a preset time or at the push of a button
- Lock readout and programming with LISTA Access Software (option)
- Time-limited access programmable via LISTA Access Software (option)

Available from 2018

**i** When ordering a LISTA product with electronic lock, please add the suffix of the relevant lock type/locking type (.C, .F or .A) to the article number from the table (e.g. 71.088.XXX.C).

**Order example for drawer cabinet with:**

**CODE Lock** = 71.088.XXX.C  
**RFID Lock** = 71.088.XXX.F  
**AUTO Lock** = 71.088.XXX.A

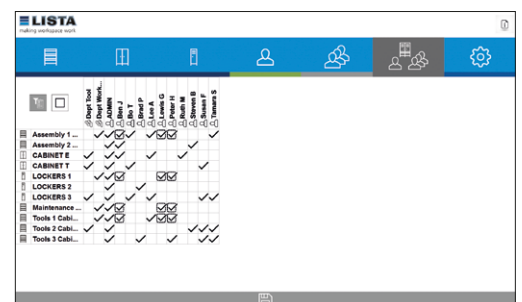

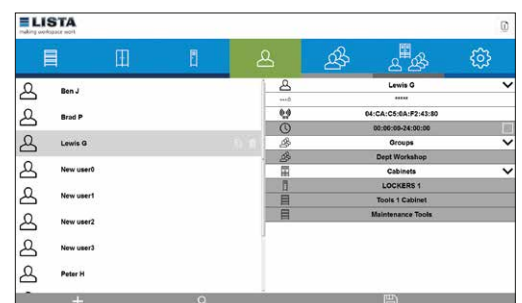

# Full control with LISTA Access

With the LISTA Access Software, you have a particularly easy and user-friendly solution for managing your LISTA CODE or RFID Lock or AUTO Lock. It enables faster learning and management of the lock, users and user groups via USB. Other additional functions are also available such as changing the Lock ID Code or creating summary assignment tables (authorisations).

### System requirements

- Operating system: Windows 7 or higher
- CPU: Intel Atom or similar (recommended Intel i3 or higher)
- RAM: 2 GB (recommended 4 GB)
- Free hard disk space: 500 MB (recommended 1 GB)

### Functions

- Lock training and management
- User management
- Group classification
- Assignment table (authorisations)
- Synchronisation of lock and database via USB

**LISTA Access Software**

ESD solutions

# SAFE HANDLING OF ELECTRONIC COMPONENTS

**ESD (Electro Static Discharge) is the electrostatic discharge of charged objects or persons by contact or a spark.** It often goes unnoticed by people due to its low energy. However, even very small electrical discharges can quickly damage electronic components. LISTA has combined many years of experience in the development of workstations with the latest findings concerning ESD issues and developed a comprehensive ESD workstation range: all surfaces have a colour coating developed by LISTA which dissipates charges in a controlled manner and prevents hazardous voltage peaks.

**+ Safety for your electronic components**

Controlled dissipation of electrostatic charges

**+ Comprehensive range of ESD products**

for all applications (minimum to full protection)

**+ Safe and neat storage**

of your electronic components

**+ Cost reduction**

No damage and latent faults on PCBs

**+ Expert planning**

of ESD workstations and workspace equipment

## ESD protection measures

ESD defects often go unnoticed and in the aftermath can be very costly. In order to avoid this problem, LISTA offers a complete ESD planning and implementation service – from advice to installation. To ensure the required quality of the workstation system components for ESD use, LISTA draws on its many years of experience in application and production.

### Workstations

The perfect workstation dissipates all charges in a controlled manner.

### Storage

Electronic components are best stored in closed ESD drawers or hinged door cabinets and shelving (Faraday cage)

### ESD accessories

During production, material and colours are used that ensure optimum discharge of electrical voltage.

Warning symbols for ESD-sensitive components.

ESD protection components

### Ordering information

Virtually all of our products are also available in ESD versions.

Request our separate ESD catalogue.

### ESD colours

LISTA ESD colours are available in four versions.

-  Orange approx. NCS S 1080-Y40R
-  Light grey approx. NCS S 2403-Y

-  Pale grey approx. RAL 7035
-  Anthracite approx. RAL 7016

Drawer cabinets

# ROBUST ALL-ROUNDERS

**LISTA drawer cabinets provide a robust and well protected storage option for equipment and many other items.** High-quality specifications and a variety of individual configuration options make these robust all-rounders ideal for a wide variety of requirements and environments. Their special design guarantees optimum space utilisation. In addition, housing and drawers can be variably partitioned, intelligently labelled, protected with access control and finished in almost any colour. Nowhere else will you find this degree of flexibility.

## ALWAYS WITH LISTA

### Free choice of colours

12 standard colours, 6 colour combinations, all other colours available; see p. 12

### Intelligent locking systems

Replaceable cylinders which can be fitted to existing locking systems, electronic numeric and remote locking systems via RFID Lock for absolute security made to measure; see p. 13

### Individual configuration options

in terms of size, equipment, locking system, colour and drawer partitions; see p. 10

### Fully combinable

with the entire LISTA range thanks to standard measurement unit; see p. 11

**+ Utmost stability**

load capacity of housing up to 4 t; load capacity of drawers 75 or 200 kg

**+ Can be utilised to the full**

since drawers can be fully extended and the drawer shell heights are optimised

**+ Well protected**

against dirt, liquids and mechanical load through closed housing with impact and abrasion-resistant surface

**+ Outstanding safety features**

safety catch to prevent the drawers from falling out and anti-tilt mechanism to prevent opening of more than one drawer at a time

**+ Corrosion protection**

with electrophoretic dip painting and environmentally-friendly powder coating

**+ Optimum order and organisation**

thanks to special LISTA partition material for every purpose and perforated, slotted drawers

**+ Professional labelling**

with LISTA Script labelling software and clip-on label holders which fold upwards

**+ Perfectly smooth running**

through differential pull-out without a crossbar

**+ Flexibly adaptable**

through pre-perforated holes for table tops (punch-outs), rollers, drawers, locking systems for easy retro-fitting and refitting

# Drawer cabinets

## + Maximum use of drawer space

### Optimum shell height

- drawer sides and rear panels the same height as the fronts
- maximum use of vertical space
- optimum protection against items falling out and loss of stored items

### Full extension

- maximum use of horizontal space
- everything in view
- optimum access

## + Perfectly smooth running

### Pull-out without crossbar

- perfectly smooth running and ease of movement through differential pull-out without a crossbar
- enables the drawer to be fully extended

### Quiet locking tab

- special plastic cover in the locking tab
- smooth and quiet locking process

## + Professional labelling

### Label holder which folds upwards

- on drawers, troughs, metal dividers, separators and housing
- for easy, clean and protected labelling

### LISTA Script

The LISTA Script labelling software offers:

- numerous labelling options
- pictograms
- barcode generator

As a LISTA customer, you can download our LISTA Script labelling software free of charge online at: [www.lista.com/script](http://www.lista.com/script)

## + Partition material for every purpose

### The LISTA standard

Our drawer partition materials are standardised and therefore compatible with the entire LISTA range.

➤ Drawer partition material see p. 204 ff.

➤ LISTA Script slide-in labels see p. 224 ff.

# Benefits of LISTA storage systems

## Storage in drawers

Storing small parts in drawers rather than on shelves ensures that stored items are protected from dust and contamination while saving space and optimising organisation. The entire contents of the drawer are visible in no time, whereas with a shelf, items may have to be moved or reached over to gain access.

- The depth of a compartment can be adapted to suit the stored items at any time, and any number of parts can be placed one behind the other
- By simply pulling out the drawer, you can clearly see the contents and have everything within reach in a truly space-saving way

### + Example of space requirement

Usable depth  $4 \times 600 = 2400 \text{ mm}$   
 Depth of aisle  $2 \times 1000 = 2000 \text{ mm}$  } Total 4400 mm

## Storage on shelves

- If the parts are smaller than the depth of the shelves, there is a lot of unused space behind the goods
- If the items are stored behind one another, then space is needed for both visibility and access

### - Example of space requirement

Usable depth  $8 \times 300 = 2400 \text{ mm}$   
 Depth of aisle  $4 \times 800 = 3200 \text{ mm}$  } Total 5600 mm

## + Optimum order and organisation

**Plastic boxes and troughs**  
for small and cylindrical items

**Tool holders**  
for NC storage

**Metal separators**  
for different sized parts

**PE foam inserts**  
for special and measuring tools

### Perforated, slotted drawers hold items firmly in place

- a series of slots around the drawer walls hold the partitioning material firmly in place
- perforated drawer bases enable slotted dividers, metal separators, dividers, holding pins or milling cutter holders to be optionally screwed in place

LISTA Units	Depth 27 E				Depth 36 E							
	18 × 27 E	27 × 27 E	36 × 27 E	54 × 27 E	18 × 36 E	27 × 36 E	36 × 36 E	45 × 36 E	54 × 36 E	64 × 36 E	78 × 36 E	
Cabinet floor area mm	411 × 572	564 × 572	717 × 572	1023 × 572	411 × 725	564 × 725	717 × 725	870 × 725	1023 × 725	1193 × 725	1431 × 725	
Drawer useful space mm	306 × 459	459 × 459	612 × 459	918 × 459	306 × 612	459 × 612	612 × 612	765 × 612	918 × 612	1088 × 612	1326 × 612	

## + Flexibly adaptable

### Variable raised edges

- raised edges on three sides of stationary cabinets for simple and easy cleaning
- raised edges on four sides of mobile cabinets to protect the goods being transported

### Punch out

- housing covers with pre-perforated holes which can be punched out
- for retrofitting with a table top or second drawer cabinet on top

### Base/forklift base

- optional base and forklift base (for drawer cabinets with a width of 36 E and over)
- makes it easy to adjust the height of the drawer cabinet
- enables the loaded cabinet to be lifted and moved with a forklift truck

### Mobile cabinets

- Our mobile cabinets are supplied with:
- raised edges on all four sides and push-bar
  - black ribbed mat
  - two swivel castors with brakes
  - two fixed castors and single-drawer locking mechanism

**Stationary cabinets can be converted to mobile cabinets at any time.**

## + Individual configuration options

As standard, LISTA drawer cabinets are available in seven different widths, two depths and a variety of heights. The configuration options in terms of size, equipment, locking system, colour and drawer partitions are almost unlimited.

Our drawer cabinets can be combined individually to suit any working environment in order to make maximum use of available space. They can be extended at any time and therefore offer a scalable solution tailored to your needs.

### Typical configurations

Configuration as a drawer cabinet

Configuration as a drawer cabinet with recessed hinged door, pull-out shelves and adjustable shelves

Configuration as a drawer cabinet with drawers, recessed hinged door, pull-out shelves and adjustable shelves

Configuration as a mobile drawer cabinet

Configuration as a picking trolley with raised edges and push-bar

ESD version available on request

## + Outstanding safety features

### Single drawer opening as standard

- prevents the cabinet from tipping over by blocking all other drawers when one drawer is pulled out
- allows for drawers to be moved around into a different arrangement at any time

### Flush drawer front

- drawer handles with side covers which sit snugly within the front profile
- look good and are safe

### Safety catches

- comply with all regulations against drawers accidentally falling out of cabinets
- reduce the risk of injuries at the workplace
- can easily be deactivated in order to move individual drawers

### Information on load capacity

- the load capacity (75 or 200 kg) is inscribed on the drawer runners
- increased safety

## + Extra safety for stationary and mobile cabinets

### Safety catch on right

- our standard safety catch for all mobile cabinets
- can be operated with one hand

### Single safety catch on the right and left

- especially suitable for mobile equipment
- both hands are needed to operate them

### Double safety catch

- has all the same features as the single safety catch on the left and the right
- easier to use since it can be operated with one hand

### Lilo locking device

- with external lever for fixing the fully laden drawer in either open or closed position
- for a drawer load capacity of 200 kg

# Drawer cabinets

## Countless configuration options

### Covers

Raised edges on three sides and ribbed mat, Resin-coated cover panel, Multiplex cover panel, Raised edges on 4 sides, with push-bar (for mobile cabinets)

### Partition material

Slotted dividers, separators, trough walls, metal separators, label holders, plastic boxes and trough separators, milling cutter holders and holding pins, non-slip mats, foam inserts and much more.

### Inserts and add-ons

Drawers, pull-out and adjustable shelves, hinged doors

### Locking systems

KEY Lock, CODE Lock, RFID Lock or AUTO Lock

### Substructures

Housing base, 2-way pallet/ forklift truck base, Pairs of castor holders, individual castors and levelling feet

## Order preconfigured models

■ or options

## ... or configure and order cabinets individually

Page 42–47

Page 204

LISTA Units

1. Housing

2. Drawers

3. Accessories

4. Partition material

- select the cabinet floor area (e. g. 717 × 572 mm = 36 × 27 E or 717 × 725 mm = 36 × 36 E)
- LISTA Unit E × E = a unit of measure which helps to choose drawers and partition materials

- choice of various housing heights (A)
- the choice of housing always includes the choice of the preferred locking system and the colour

- define the height of the front, the load capacity, the colour and the type of safety catch
- sum of the drawer front heights (C) = clear height (B) (see diagram)

- can be equipped with drawers and doors
- select the cabinet accessories
- mobile cabinets must have a drawer safety catch and a push-bar

- select the partition material for the drawers
- N.B.: take the drawer height and usable surface into account!

## 12 standard colours

### Maximum flexibility thanks to free choice of colours

All products with a choice of colours are available in 12 standard colours and 6 colour combinations without surcharge. The three-digit colour code (e.g. .010) forms part of the article number. When ordering, please complete the article number by adding the desired three-digit colour code (e.g. **70.701.010**). Housings and drawers can also be ordered in different colours.

## Drawer cabinets | stationary and mobile

In addition to the stationary versions, all LISTA drawer cabinets are also available as mobile cabinets. This increased mobility provides greater convenience and gains extra space. Mobile cabinets enable you to transport stored items easily and quickly and can conveniently be stored under a work surface if space is at a premium.

### + Greater mobility

through smooth-running nylon and rubber castors, depending on the properties of the floor

### + Optimum use of space

when positioned under work surfaces

### + Safe and convenient

thanks to raised edges all round, ergonomic push-bar and additional drawer safety mechanisms

### >> Benefits of LISTA drawer cabinets

see p. 20/21

## Equipped with drawers and doors

Drawer cabinets can optionally be fitted with drawers and a door. Because the door is recessed, special pull-out shelves are used. As standard, the two locks have different keys. Identical locks or a CODE/RFID Lock locking system are available on request (CODE/RFID Lock is not available for doors).

○ = on request

## 2. Drawers

Drawers with different front heights can be incorporated into the same cabinet housing in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm, which means each drawer can be partitioned as required.

Select load capacity

### Drawer safety catches

**Standard:** standard model including single drawer safety catch (all article numbers from the table).

**Safety catch on right:** the minimum requirement for mobile drawer cabinets. One-sided drawer safety catch on the right can be released with one hand and prevents accidental opening of drawers even if the cabinet is unlocked.

**i** When ordering a **single safety catch on the right**, please add the suffix «R» to the article number in the table (e.g. **72.034.XXX.R**).

### Ordering tips

When selecting drawers, the clear height of the cabinet housing defines the size. The sum of the drawer front heights (C) must be equal to the clear height (B) (see diagram).

## 3. For further accessories

➤ see next page

## 4. Partition material

for drawers

➤ see p. 204 ff.

## Recessed hinged doors for pull-out and adjustable shelves

Made from sheet steel as a front closing option for the pull-out and adjustable shelves built into the housing beneath the drawers. The sum of the hinged door front heights and all drawer front heights must be equal to the clear height of the cabinet housing.

## Pull-out and adjustable shelves for recessed doors

Made from steel sheet, pigeon grey, NCS S 4502-B. Load capacity of pull-out shelf 75 kg, adjustable shelf 200 kg. Thanks to the 25 mm increments in the vertical supports of the cabinet housings, different shelves can be fitted in the same housing in any order.

## Raised edges on 3 sides and ribbed mat

Made from sheet steel, black, NCS S 9000-N, including ribbed mat, black.

## Cover panel, resin-coated

Surface and edging light grey, NCS S 1500-N, laminated chipboard (quality class E1), with melamine coating on both sides (manufactured according to standard EN 14322). 2 mm thick plastic edging on all sides. Including pre-drilled holes and fastening material.

## Multiplex cover panel

Made of steamed beech veneers, glued in multiple layers and waterproof (DIN 68 705), bevelled edges, sanded, oiled and waxed surface. The panel is splash-proof, dirt-repellent and largely impervious to oil and grease. Including pre-drilled holes and fastening material.

## Housing base

Made from sheet steel, as height compensation, black, NCS S 9000-N.

## 2-way pallet/forklift truck base

Made from sheet steel for screwing to the underside of the housing, black, NCS S 9000-N. **Base cover only** for attaching as a cover on the front or rear.

### Raised edges on 4 sides, with push-bar

Made from sheet steel, black, NCS S 9000-N, including ribbed mat, black. Push-bar consisting of a pair of plastic handle grips, RAL 9006 white aluminium, and aluminium tube Ø 25 mm, clear anodised.

### Pair of castor holders

Consisting of 2 swivel castors with brakes and 2 fixed castors. Castor holders, sendzimir galvanised. Nylon castors black, rubber castors grey.

**For safety reasons, mobile drawer cabinets must be fitted with a push-bar and a single drawer safety catch.**

### Protective strip

Made of black polythene, including fastening screws for mounting on the sides of the drawer cabinet. Two protective strips must be attached to each side.

### Levelling foot set

Set consisting of 4 plastic pivot feet, Ø 50 mm, including mounting plates and fastening screws. Adjustment range: 45 – 90 mm. Load capacity: 1200 kg/foot.

# Drawer cabinets | Workshop add-on modules

**Bespoke workshop design to suit your line of work.** Workshop equipment from LISTA has been tried and tested thousands of times in diverse industries. The modular design and excellent quality ensure that LISTA applications fit perfectly, are durable and robust. Special industry requirements are consistently met.

**+ Modular system design concept**  
offering flexible configuration in terms of size, equipment, locks, colour, etc.

**+ Best industrial quality**  
by using high-quality materials with a high level of in-house production and a 10-year guarantee.

**+ Fully compatible**  
with freely combinable modules, uniform and attractive look and feel consistent with your corporate design in all areas: workshop, warehouse, staff room, etc.

**>> Benefits of LISTA workshop add-on modules**  
see Automotive MRO Workshop System brochure

**Levelling feet**

All workshop special modules on this page have four levelling feet per module with an adjustment range of 45–90 mm. Levelling feet allow adjustment to compensate for uneven floors and for protection against moisture.

**Media supply cabinet**

Suitable for mounting hose reels for oil, compressed air and power.

\* CH version: 1 × overcurrent protection instead of socket outlet 230V

## Drawer cabinets I with hinged or sliding doors

**LISTA drawer cabinets with hinged or sliding doors are ideal for large and heavy inventory items.** The doors enable tall items to be safely locked away and protected from dirt, damage and unauthorised access. The flexible inner partitioning options and a variety of locking systems ensure that you have the best solution for your needs – all with lots of clever details and a 10-year guarantee. Just as you would expect from LISTA.

**+** **Additional storage space and work surfaces**  
through non-slip, easy-to-clean covers with raised edges all round

**>>** **Benefits of LISTA drawer cabinets**  
see p. 20/21

**>>** **Drawer cabinets with hinged or sliding doors for NC storage**  
see p. 52/53 and 78

**+ Ideal for large and heavy inventory items up to 200 kg / drawer**

with pull-out shelves for flush storage

**+ Securely lockable**

with a choice of hinged doors or space-saving sliding doors

**+ Can be adapted to new storage items at any time**

because drawers, pull-out shelves and adjustable shelves can be flexibly added or modified in 25 mm increments

**+ Can easily be moved with a forklift truck**

even with loaded cabinets, by using forklift truck bases

# Top-mounted cabinets for drawer cabinets

**Lots of storage in a small space: LISTA top-mounted cabinets provide additional storage area when space is at a premium.** The stored items are in plain sight and easy to reach because they are positioned at viewing height. LISTA top-mounted cabinets are perfectly coordinated with our drawer cabinets and made from high-quality steel. In short: the perfect add-on for fast access to tools and equipment supporting continuous improvement processes such as Kaizen and 5S.

- + Extra storage area**  
when space is at a premium
  - + Everything in sight**  
through viewing windows made from UV-resistant shatterproof acrylic glass
  - + Extremely user-friendly**  
since the items stored are within easy reach
  - + Securely lockable**  
with a choice of hinged doors or space-saving sliding doors
  - + Can be adapted to new storage items at any time**  
because adjustable shelves can be flexibly added or converted in 25 mm increments
- >> Benefits of LISTA drawer cabinets**  
see p. 20/21

### Locking systems

The standard **KEY Lock** locking system with replaceable cylinders allows easy adaptation to existing locking systems. Further locking systems, e.g. CODE Lock and electronic locking via RFID transponder on request.

### Doors with viewing windows

Provide an open view of the contents and also encourage users to keep the contents tidy.

### Pin hinged doors

Doors are flush with the cabinet housing. Opening angle approx. 115°.

### Turn and push cylinder lock and smooth, quiet operation

Cannot be prised out thanks to a bar bent to right angles. The ball bearing rollers of the sliding doors run very quietly on the guide rails.

# LISTA Electronic Control

The electronically controlled access system LISTA Electronic Control gives you maximum flexibility to allocate and manage access rights. This means that you can not only control access to the entire cabinet, individual drawers or the drawer compartments developed specially for this system but can also combine different system versions in a single cabinet. Just as required.

- + **Ideal protection**  
from unauthorised access
- + **Constant availability and full traceability**  
of valuable or scheduled inventory 24/7
- + **Maximum flexibility**  
through individual access rights and locking levels
- + **Simple control**  
thanks to intuitive operation
- + **Additional security**  
through metal drawer compartments specially developed for this system
- + **Reduced inventory loss and better planning**  
giving direct cost savings and increased productivity
- ! **LISTA Electronic Control is available either as a complete system consisting of hardware and software or as hardware only to enable you to use your own software.**

## The modular system for internal logistics solutions

Level 1 Security

### Access control at cabinet level

#### LCC – LISTA Cabinet Control

Electronically controlled access to the entire cabinet.  
Available for sizes  
36 × 36 E (717 × 725 mm)  
54 × 36 E (1023 × 725 mm)

Level 2 Security

### Access control at drawer level

#### LDC – LISTA Drawer Control

Electronically controlled access to specific drawers.  
Available for sizes  
36 × 36 E (717 × 725 mm)  
54 × 36 E (1023 × 725 mm)

Level 3 Security

### Access control at compartment level

#### LPC – LISTA Parts Control

Electronically controlled access to specific drawer compartments. Available for sizes  
36 × 36 E (717 × 725 mm)

#### Examples of usage

- Protective clothing
- Medical dressings
- Low-cost spare parts
- Simple tools
- Consumables

#### Examples of usage

- Medicines
- Medical supplies
- Spare parts
- Tools
- Measuring instruments

#### Examples of usage

- Cutting tools
- Medical devices
- Hazardous substances
- Measuring instruments
- Valuables

## LISTA Service – always the best advice

### Analysis of requirements

Your individual requirements are discussed and defined and the conditions on-site are assessed.

### Optimisation and planning

All storage optimisation possibilities are assessed and a plan is drawn up which takes all factors such as available space, products and systems into account. All the important aspects such as fire prevention, safety at work and building planning controls are included in the planning.

### Installation and training

Our qualified specialists install the system on-site and provide full training to guarantee a smooth start-up.

### After-sales service

After installation our experienced staff are available to help you with advice and assistance at any time.

## LISTA Workshop trolley L3627

# MORE FLEXIBLE THAN EVER

The new LISTA workshop trolley L3627 has been optimised for you in all of its key features and now offers you even more benefits, functions and improved ergonomics. In addition to even greater load capacities, its flexibility and adaptability make it the perfect solution for every area in the workplace. Because the basic models can be expanded to meet requirements at any time with versatile superstructures and add-ons.

- 
- + Optimum load capacities**  
Load capacity 40 kg per drawer, 400 kg housing
  - + Can be utilised to the full**  
since drawers can be fully extended and drawer shell heights are optimised
  - + Absolutely safe to work with**  
Central locking and single drawer opening or double protection against accidental opening when in motion
  - + Flexibly adaptable**  
through perforated side and rear panels for holding accessories and tool hooks
  - + Extremely user-friendly**  
with robust, ergonomic push handle
  - + Full mobility**  
thanks to the smooth-running fixed and swivel castors (two of each) in solid rubber
  - + Additional storage space and work surface**  
through hard-wearing wooden cover or non-slip plastic cover with compartments for small parts
  - + Additional safety**  
through rounded corner pieces made from ABS plastic which act as buffers
  - » Fully compatible with LISTA partition material thanks to the standardised unit of measure** see p. 204

## + Fully modular and available in a wide range of versions

Depending on use and individual requirements, the basic models can be flexibly expanded in many ways by means of optional accessories.

### Fully extendable without crossbar

- load capacity 40 kg
- enables it to be fully extended
- extremely smooth-running with great ease of movement

### Partition material

- perforated, slotted drawers hold items firmly in place
- extensive range of partition material in the LISTA measurement unit see p. 204

### Labelling

- handle folds upwards
- easy, clean and protected labelling

### Single safety catch

- can be operated with one hand
- protects against accidental opening when in motion

### Double safety catch

- for even greater safety
- easier to use since it can be operated centrally with one hand

### Central locking

- a central locking system for all drawers
- secure and easy to use

### Smooth-running castors

- two fixed castors
- two swivel castors including brake
- in solid rubber
- with generous Ø 100 mm

### Push bar

- robust
- ergonomic
- material: anodised aluminium

### Corner pieces

- protect against damage and also protect other workshop equipment or vehicles in the event of accidental contact
- material: ABS plastic
- colour: black, RAL 9005.

### Wooden cover

- hard-wearing
- sanded, oiled and waxed surface
- material: Multiplex

### Plastic cover

- non-slip
- including compartments for small parts
- material: ABS plastic
- colour: black, RAL 9005.

### Perforated side panel

- perforated and slotted for holding accessories and keyhole hooks
- so that everyday tools are always ready to hand

### Perforated rear panel

- for fixing to the rear of workshop trolleys
- perforated and slotted for holding accessories and keyhole hooks see p. 61
- ergonomic tool arrangement

➤ For keyhole hooks and storage containers see p 130/131

For colour information see fold-out page. When ordering, please use the desired three-digit colour code (instead of XXX).

## Drawer storage walls

# STRONG AND SAFE

**LISTA drawer storage walls are perfect for storing large, heavy single items or a large number of small items and keeping them clearly organised and protected from dust and dirt.** All add-ons, drawers, pull-out shelves and adjustable shelves can be freely combined with one another. This enables a wide variety of different types of installation – even inside trucks and containers. The necessary changes can be made simply by reorganising the individual elements. This means that you can adapt your system to new logistics requirements at any time, so that you always have: A Solution to Match Your Needs. With all the benefits of our drawer cabinets.

### ALWAYS WITH LISTA

#### Free choice of colours

12 standard colours, all other colours available; see p. 12

#### Intelligent locking systems

Replaceable cylinders which can be fitted to existing locking systems, electronic numeric and remote locking systems via RFID Lock for absolute security made to measure; see p. 13

#### Individual configuration options

in size, equipment, locking system, colour and drawer partitions; see p. 10

#### Fully combinable

with the entire LISTA range thanks to the standardised unit of measurement; see p. 11

**+ Utmost stability**  
through robust, sturdy design with a load capacity of up to 5.5 t per shelving unit

**+ Large storage capacity with minimum space requirement**  
since shelves can be up to 8.50 m high

**+ A wide variety of equipment options**  
with different pull-outs and shelves

**+ Vertical pull-outs for clearer organisation and improved safety at work**  
as a space-saving and user-friendly solution with direct access to the stored goods from both sides

**+ Heavy-duty pull-outs**  
with load capacities of up to 350 kg for especially large and heavy items

**+ User-friendly**  
through swing-out and sliding safety ladders for easy access to the upper shelves and drawers

**+ Secure locking**  
with a choice of roller shutters, hinged doors or space-saving sliding doors, optionally with viewing windows

**+ Can be adapted to new storage items at any time**  
through the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm

**» Benefits of LISTA drawer cabinets**  
see p. 20/21

# Drawer storage walls

- 4** Shelf side panel
- 5** Side panel cover
- 6** Universal shelves
- 7** Adjustable shelves
- 8** Dividers
- 9** Drawers
- 10** Fixed and locking shelves
- 11** Pull-out shelves
- 12** Heavy-duty pull-outs
- 13** Side frames for vertical pull-outs\*
- 14** Vertical pull-outs\*
- 15** Shelves for vertical pull-out\*
- 16** Locks for vertical pull-outs\*
- 17** Accessories for vertical pull-outs\*
- 18** Roller shutters, hinged and sliding doors
- 19** Levelling plates
- 20** Anchoring set
- Safety ladder\*
- Accessories for mobile furnishings\*

\* see LISTA Compendium

## + A wide variety of equipment options

### Fully extendable drawers

- load capacity 75 kg or 200 kg
- differential pull-outs without crossbar for perfectly smooth running
- For details see p. 22

### Fully extendable pull-out shelves

- load capacity 75 kg or 200 kg
- differential pull-outs without crossbar for perfectly smooth running
- inserts provide flush storage
- pull-out shelves with eyelets for fixing heavy parts on request

### Vertical pull-outs

- up to a load capacity of 200 kg (500 kg on request)
- for suspended and protective storage of pre-set tools
- optionally available with storage shelves, adjustable shelves, NC holder attachments and perforated panels

### Heavy-duty pull-outs

- up to a load capacity of 350 kg
- extremely smooth running
- Wood or steel inserts and ribbed mats are available

### Adjustable and universal shelves, partitions and shelf side panels

- adjustable shelves: load capacity up to 200 kg, can be attached without screws
- universal shelves: up to a load capacity of 250 kg, can be fixed with screws
- optionally either plain or slotted for subdividing with partitions and side panels

### Stable side frames

- for shelf heights up to 8.50 m over several storeys
- can be covered with side panel covers
- also available for special inserts and mobile equipment on request

### Secure locking

- with lockable hinged doors
- sliding doors and roller shutters on request

## + Individual configuration options

LISTA drawer storage walls are available in two depths and can be configured to suit your exact individual requirements. The LISTA Unit enables all individual parts, drawers and partition materials to be freely combined with one another and quickly and easily replaced or added to.

### Typical configurations

**D 27 E**

#### Installed depth 553 mm

- ideal for locations with limited available space
- preferred system for use inside containers
- reduced depth makes it easy to remove heavy parts

**D 36 E**

#### Installed depth 706 mm

- maximum flexibility through large selection of products and accessories
- allows vertical pull-outs and heavy-duty pull-outs to be used
- available in five different widths

➤ Dimensions and load capacities see next page

## + Flexible range of applications

#### Mobile equipment

- in containers and trucks

#### Medicine storage

- well-organised and within reach

## + User-friendly

#### Safety ladders

- can be swung out and moved sideways for easy access to the upper shelves and drawers

## Dimensions and load capacities

**G** = Unit length (without side panels) = sum of installed widths + sum of side frames  
 Unit length (with side panels) = sum of installed widths + sum of side frames + 47 mm

### Unit widths for depth 27 E and 36 E

<b>W</b> → LISTA Units	<b>36 E</b>	<b>45 E</b>	<b>54 E</b>	<b>64 E</b>	<b>78 E</b>
Installed widths mm	<b>664</b>	<b>817</b>	<b>970</b>	<b>1140</b>	<b>1378</b>
Side frames	50	50	50	50	50
Side panel cover	23,5	23,5	23,5	23,5	23,5

## Configure and order drawer storage walls individually

**D** ↗ **27 E**

**D** ↗ **36 E**

**LISTA Units**

- Select floor area of storage wall W × D (e.g.: 664 × 706 mm = 36 × 36 E)
- LISTA Unit E × E = measurement unit for selecting side frames, stabilising elements, shelves, drawers and hinged doors

**1. Side frames and stabilising elements**

- Select height of side frames **H**
- Select stabilising elements: rear panel or diagonal brace
- Floor anchor, drawer storage walls must be anchored
- Optional: levelling plates, frame pillar top covering, intermediate fill-in strip, side panel covers and partitions

**2. Universal, locking and fixed shelves**

- Depending on the height of the unit, a minimum number of universal shelves are necessary – please refer to the table
- Fixed and locking shelves including locking systems are used when drawers need to be lockable. Here, the universal shelves can be dispensed with entirely or used as a top shelf for the top of the side frames.

**Diagonal brace arrangement**

The load capacities only apply for six shelf units or more two shelf units or at least every fifth shelf unit has rear panels or every third shelf unit has a diagonal brace. From a unit height of 2200 mm an additional universal shelf is required as an intermediate shelf. In the case of two-storey systems, the lower story in every third unit must be fitted with a diagonal brace or rear panel.

**Anchoring rule**

All drawer storage walls must be anchored. 1 anchor is included for each side frame. Exception: double-sided drawer storage walls which are screwed together back-to-back do not need to be anchored.

**Note:** when using only one mounting fixture per side frame, it must be attached to the rear.

**D** = Clear height = number of gaps between slots × 25 mm; slots every 25 mm in the side panels for installing shelves and drawers

**Wall heights and load capacities**

<b>H</b> ↑ mm	<b>1000</b>	<b>1450</b>	<b>2000</b>	<b>2200</b>	<b>2500</b>	<b>3000</b>
<b>Clear height D</b> mm	900	1350	1900	2050	2350	2850
<b>Load capacity per shelving section</b>						
min. number of universal shelves	2	2	2	3	3	3
min./max. installed height for the middle universal shelves from floor (mm)	-	-	-	900–1300	1050–1450	1300–1700
load capacity per shelving section	5500 kg	5000 kg	4500 kg	5500 kg	5250 kg	5000 kg

**3. Fitments**

- Selection of adjustable shelves, drawers, pull-out shelves and heavy-duty pull-out shelves as desired
- Optional: dividers for adjustable shelves, slotted
- Optional: partition material see p. 204

**4. Front-mounting fitments**

- Lockable hinged doors over partial and total height
- Sliding doors, roller shutters on request

In order to comply with regulations and for reasons of safety, drawer storage walls must consist of at least the following elements:

- Side frames
- Floor anchoring
- Rear panels OR diagonal braces
- Universal shelves (plain or slotted)

➤ Individual elements see p. 67–75

## Drawer storage walls | heavy-duty versions

For storing heavy single parts and appliances, LISTA drawer storage walls have drawers and pull-out shelves with a load capacity of up to 200 kg. This gives you maximum flexibility – especially when storing NC tools.

**+** Ideal for large and heavy inventory items up to 200 kg per drawer with pull-out shelves for flush storage

**+** Extremely smooth running through differential pull-outs without crossbar

**+** Can be adapted to new storage items at any time through the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm

**>>** Benefits of LISTA drawer cabinets see p. 20/21

**>>** Drawer storage walls for NC storage see LISTA Compendium

**Standard colour combination:**

Housing/shelves:

**i** Drawer load capacity  
up to 200 kg

**Universal and adjustable shelves**

The universal shelves (load capacity 250 kg) are screwed to the side frames. The adjustable shelves (load capacity 200 kg) are attached to the side frames by means of shelf supports and can be adjusted for height. Usable dimensions: W 970 x D 701 mm.

**Pull-out shelves**

For the storage of heavy items and assemblies which can be stored flush with the handle by using a sheet metal insert. Fully extendable. Load capacity 75 or 200 kg. Height-adjustable in 25 mm increments.

 For more universal, adjustable and pull-out shelves see p. 72 and 74

 For suitable partition material for drawers see p. 204

Fastening

### Frame top covering

For covering the top of the side frames. Specification: steel sheet. Colours: as per colour chart.

### Intermediate fill-in strip

To close off intermediate spaces when shelves are placed next to each other at the same height. Including 2 holding bars. Cannot be inserted between side panels and shelves. Specification: Sheet steel. Colours: according to colour chart.

### Rear panels

Rear cover for row of shelving units. Help to stabilise the shelving units lengthwise. Can be used for base and add-on units. Rear perforations for screwing rear panels to a container wall using horizontal C-brackets. Including screw fasteners. Can be stabilised with diagonal braces instead of rear panels. Specification: steel sheet. Colours: as per colour chart. Joint cross-section: anthracite grey, RAL 7016.

Fastening

or...

### Diagonal braces

Used instead of rear panels to stabilise units lengthwise. Including screw fasteners. Specification: galvanised steel.

## Side panel covers

Side cover for row of shelving units. For hanging in the side frames by means of shelf supports. Including floor anchor. Specification: steel sheet. Colours: as per colour chart.

## Partitions

For retrofitting by hanging on the side frames. Serves to protect against theft, especially behind sliding doors, hinged doors and roller shutters. Can be used on left and right. Specification: steel sheet. Colours: as per colour chart. **N.B.** Remember to order a nut holder for fastening the shelf.

## Shelf side panels

As side closure when the gap between units cannot be closed by a fill-in strip. Attached to the side frames. Specification: steel sheet. Colour: light grey, RAL 7035. \* Min. clear height mm of compartment equals height + 50 mm.

## ! Universal shelves, plain or slotted

Screwed to the side frames as top and bottom closure and intermediate shelf. Including screw fasteners. Choice of plain or slotted versions. Slots 15 mm apart for subdividing partitions. Specification: steel sheet. Colours: as per colour chart.

## Adjustable shelves, smooth or slotted

Are inserted between the side frames using shelf supports, with welded strengthener. Choice of plain or slotted versions. Slots 15 mm apart for subdividing with partitions. Including 4 shelf supports each. Specification: steel sheet. Colours: as per colour chart.

## Partitions

To subdivide the slotted universal and adjustable shelves. Specification: steel sheet. Colour: light grey, RAL 7035.

**!** In order to comply with regulations and for reasons of safety, drawer storage walls must consist of at least the following elements

# Drawer storage walls | drawers, locking and fixed shelves

Select load capacity

## Drawers

Drawers with different front heights can be incorporated into the same shelf unit in any order. The insides of the drawer walls are all fitted with a slotted grid in units (E) of 17 mm so that each drawer can be partitioned as required.

## Ordering information

When selecting the drawers, the clear height of the wall defines the maximum size. The sum of the drawer front heights (C) must be equal to the clear height (B) (see diagram). For filling and loading the drawers and drawer walls please follow the installation manual and observe the loading rules. Load capacity applies to an evenly distributed load.

#### KEY Lock

The standard locking system with replaceable cylinders makes it easy to adapt to existing locking systems. The locking system secures all drawers simultaneously.

#### CODE Lock

Here the key is replaced by a simple numeric combination. A simple four to six-digit numeric combination is sufficient to open the drawer.

#### RFID Lock

The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification.

#### AUTO Lock

Like LISTA RFID Lock, opens and locks the cabinet automatically without manual operation. Access and locked time management with LISTA Access software via USB.

## Pull-out shelves

For storing heavy individual items and equipment. Variable fitting heights of 25 × 25 mm in the side panels. The inserts enable stored items to be stored and removed flush with the handle. Specification: steel sheet. Colours: as per colour chart. Bottom inserts are made of galvanised steel.

## Heavy-duty pull-outs

Heavy-duty pull-outs are mainly used in machine tool production for storage of assemblies and tools. Even with a heavy load, the heavy-duty pull-out is easy to use. With a welded construction and pull-out frames running on multiple ball-bearings. The runners can be built directly into the side panels of the drawer walls of sizes 54 × 36 E without any adjustments. Specification: Shaped steel sheet. Colour: Grey, NCS S 4502-R.

## Inserts and supports for heavy-duty pull-out shelves

**Multiplex top:** Can be inserted without screwing into the heavy-duty pull-out shelves. Made of steamed beech veneers, glued in multiple waterproof layers, rounded corners. Sanded, oiled and waxed surface. The top is splash-proof, dirt-repellent and largely proof against oil and grease.

**Slat inserts:** can be inserted without screwing into the heavy-duty pull-out shelves. Specification: Sendzimir galvanised shaped sheet steel.

**Ribbed mats:** provide protection. To be placed on top of the wooden inserts or on the metal slat insert panels. Specification: includes self-adhesive strips. Colour: Black.

## Hinged doors made of full sheet steel or equipped with viewing windows

With two panels and a two-point rod lock with a recess for a clasp lock. The hinged doors can be retrofitted to all shelf units. Specification: sheet steel or sheet steel with viewing windows. Colours: as per colour chart.

For the version with **hinged doors**, the **clasp lock** shown below must be ordered separately.

## Clasp locks

The standard KEY Lock locking system with replaceable cylinders makes it easy to adapt to existing locking systems. With CODE Lock, the key is replaced by a simple numeric combination. The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification.

NC storage and transport systems

# PROFESSIONALS AT WORK

NC storage and transport systems made by LISTA give you the perfect solution for your tool logistics. Our NC modules not only provide professional storage in inserts specially optimised for your machining and cutting tools, but also a safe method of transporting them. Tools are stored in a space-saving and organised way and are always within reach and ready for use. That's not all: our NC modules can be individually equipped and can of course be freely combined with the entire LISTA system in order to make the best possible use of the valuable space in your production facility.

**+ Safe, neat and orderly storage**  
in high-quality inserts made from break-proof, impact-proof and oil-resistant ABS material tailored to hold your cutting tools

**+ Optimum use of space**  
because these high-capacity systems are not only space-saving, but the tools are just where you need them – right next to the machine

**+ Customised and easy to assemble**  
using tool holders with snap fasteners for tool-free insertion and removal

**+ Secure transport**  
thanks to robust and stable design

**+ User-friendly and ergonomic**  
because tool holders can be fitted at an angle and shelves and drawers can be pulled out

**>> Benefits of the LISTA drawer cabinets**  
see p. 20/21

## ! ALWAYS WITH LISTA

### Free choice of colours

12 standard colours, all other colours available; see p. 12

### Intelligent locking systems

Replaceable cylinders for adapting to existing locking systems, electronic numeric and remote locking systems for absolute security made to measure; see p. 13

### Individual configuration options

in terms of size, equipment, locking system, colour and drawer partitions; see p. 10

### Fully combinable

with the entire LISTA range thanks to standard measurement unit; see p. 11

## Partitioning schemes for NC tool containers

The capacity of each of the different storage and transport units for NC tools is given in the table below. The partitioning scheme for each type of tool is given next to the corresponding article number. With this scheme you can use the table to calculate the maximum capacity for each storage and transport unit used.

### Insert frames in drawers and NC transport units

Units (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H
36 × 27 E*	612 × 459	27	24	21	18	15	12	3
54 × 27 E	918 × 459	42	39	33	27	24	21	-
36 × 36 E*	612 × 612	36	32	28	24	20	16	4

\* also for NC transport units

### NC storage in vertical pull-outs

➤ Drawer storage walls and vertical pull-out cabinets see p. 62 and 154

### Tool cradles for NC cabinets and NC transport units

suitable for Width (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H
36 E*	562 × 140	9	8	7	6	5	4	1
54 E**	946 × 140	16	14	12	10	8	7	-

\* for NC transport units, \*\* for NC cabinets

### NC storage in transport units

### NC bench stand

With insert frame for 3 strips.

Units (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H
36 × 27 E	588 × 413 × 345	27	24	21	18	15	12	3

### NC storage in bench stand

## Version with pair of frame supports

LISTA frame supports for NC systems have adjustable ranges with three positions so that the height can be variably adjusted to match the items stored. The distance from the insert frame to the top of the tool holder is always 12 mm.

For storage heights  
82-102 mm  
(27 E and 36 E)

For storage heights  
127-162 mm  
(27 E and 36 E)

For storage heights  
187-222 mm  
(27 E and 36 E)

### NC storage in drawers

➤ Drawer cabinets with hinged or sliding doors see p. 50

## Version with tool cradles

LISTA tool cradles for NC systems are available in two heights. The distance from the cradle to the top of the tool holder is always 12 mm.

For storage heights 96-135 mm  
(27 E and 36 E)

### NC storage in cabinets

## NC tool holder system

With this system a number of versions are available for different tools and can be fitted in a support in any combination. The holders are screwed together or fixed by means of snap fastener. Specification: high-quality plastic. Colour: red.

➤ Partitioning schemes see p. 79

**i Note**  
HSK tool holders are available in green on request. The red and green tool holders are required to differentiate between sharp and used tools.

### ISO-SK tool holders

Specification	Width mm	Height mm	Cone Ø top mm	Number of tools per holder	Partitioning schemes	Art. no.

VDI 60 cylindrical	105	108,5	60,5	1	F	12.884.000

\*Screwed, see tool holders to drill out yourself.

### Capto tool holders

Specification	Width mm	Height mm	Cone Ø top mm	Number of tools per holder	Partitioning schemes	Art. no.
Capto C3	58	31,5	22	1	A	12.650.000
Capto C4	58	31,5	28	1	A	12.651.000
Capto C5	65,6	31,5	35	1	B	12.652.000
Capto C6	87,5	34	44	1	E	12.653.000
Capto C8	105	42	55	1	F	12.654.000
Capto C10	120	52	72	1	G	12.655.000

### Tool holders to drill out yourself

For any tools.

Specification	Width mm	Depth mm	Height mm	Number of tools per holder	Partitioning schemes	Art. no.
for you to drill out 58*	58	138	20	as you like	A	12.832.000
for you to drill out 535*	535	138	20	as you like	H	12.838.000

\*Screwed.

\* **Explanation of «screwed»:** screwed tool holders are screwed onto the insert frame or the tool cradle frame with 1 or 2 allen screws.

### Insert frame and pairs of frame supports

Available as a set or as individual components. One pair of frame supports is needed for each insert frame. By having frame supports in different heights which can be screwed onto the perforated drawer base together with the insert frame, tools with different cone lengths can be stored in drawers.

Adjustable ranges see p. 79

Partitioning schemes see p. 79

**i**

**Ordering information**  
Always take into account the maximum storage height of the tools including any fitting pins.

### Insert frame for drawers

To accommodate all types of tool holder. One pair of frame supports is needed for each insert frame. Including screw fasteners. Without pair of frame supports. Specification: steel sheet. Colour: grey, NCS S 4502-B.

For drawer sizes Unit (E)	Number of rows	Width mm	Depth mm	Height mm	Art. no.
36 × 27 E	3	584	447	64	12.846.000
54 × 27 E	3	890	447	64	12.243.000
36 × 36 E	4	584	596	64	12.848.000

### Pair of frame supports for insert frame

The position of the insert frames can be adjusted for height. Not necessary for tools with a height of less than 64 mm. Including screw fasteners. Specification: steel sheet. Colour: grey, NCS S 4502-B.

For depth (E)	Specification	Height mm	Cone length mm	Art. no.
27 E	447/60-110	60-110	80-160	12.907.000
36 E	596/60-110	60-110	80-160	12.904.000

For insert frames 12.846.000, 12.243.000.

For insert frames 12.848.000.

### Tool holder sets 36 × 27 E

For inserting into drawers. Includes 1 insert frame, 1 pair of frame supports Art. no. 12.907.000. Width 588 mm, depth 447 mm, height 82-162 mm.

Equipped with	Partitioning schemes	Art. no.

Art. no.

4 Drawers (front height 75 mm, load capacity 200 kg),  
4 Insert frames including pair of frame supports, Art. no. 12.907.000, including single-drawer opening system

without tool holder	-	<b>78.971.XXX</b>
156 holders ISO-SK 40	B	<b>78.972.XXX</b>
96 holders ISO-SK 50	F	<b>78.973.XXX</b>
108 holders HSK 63 A+C+E/80 B+D+F	E	<b>78.975.XXX</b>

### Fully extendable drawers

- load capacity 200 kg
- perfectly smooth running through differential pull-out without a crossbar
- details see p. 22

8 Tool cradle  
8 Pair of frame supports, at an angle of 15°, Art. no. 12.047.000

without tool holder	-	<b>15.315.XXX</b>
112 holders ISO-SK 40	B	<b>15.635.XXX</b>
64 holders ISO-SK 50	F	<b>15.636.XXX</b>
80 holders HSK 63 A+C+E/80 B+D+F	E	<b>18.395.XXX</b>

### Insert frames and pairs of frame supports

- insert frames can be used in cabinets, drawers and transport units
- tool cradles horizontal or at a slight incline, can easily be attached to vertical pull-outs, table stands, transport units and cabinets without screws
- for quick and safe access

4 Tool cradle,  
2 Drawers (front heights 100 / 150 mm, load capacity 200 kg),  
1 Pull-out shelves (200 kg), including single-drawer opening system

without tool holder	-	<b>15.317.XXX</b>
56 holders ISO-SK 40	B	<b>15.639.XXX</b>

Workbenches

# WELL ORGANISED

Thanks to the wide range of combination options, each workstation can be individually equipped with LISTA workbenches to optimise space. The combinable workbench tops, drawers and equipment cabinets, vices and rear panels can be organised to create optimum working conditions. The latest findings in ergonomics are incorporated and everything is delivered to the highest LISTA quality even for the most demanding working environments in workshops and heavy industry.

## ALWAYS WITH LISTA

### Free choice of colours

12 standard colours, 6 colour combinations, all other colours available; see p. 10

### Intelligent locking systems

Replaceable cylinders which can be fitted to existing locking systems, electronic numeric and remote locking systems via RFID Lock for absolute security made to measure; see p. 11

### Individual configuration options

in size, equipment, locking system, colour and drawer partitions; see p. 12

### Fully combinable

with the entire LISTA range thanks to the standardised unit of measurement; see p. 13

**+ Utmost stability**  
workbench load capacity up to 3 t, workbench top extremely robust and resistant

**+ Great design diversity**  
thanks to the wide range of components, substructures, materials and surfaces

**+ Easy to use and highly ergonomic**  
with height-adjustable workbench legs for optimum working heights and leg room – also available for our modular superstructure system

**+ Easily adaptable to new working environments**  
through flexible integration and reconfiguration of the modular system

**+ Fully mobile**  
when fitted with rubber or nylon castors for mobile use

**+ Fast and easy assembly**  
as the workbench tops have pre-drilled holes including threaded inserts (pre-assembled) for fastening all substructures and drawer cabinets

**>> Universal superstructures**  
see p. 110

**>> Benefits of LISTA drawer cabinets**  
see p. 20/21

**>> Desk chairs**  
see p. 132–135

## + Various substructures

### Workbench legs

- sturdy steel plate construction
- welded from steel profiles
- with holes for attaching worktops and shelves

### Castors for mobility

- for mobile workbenches
- fixed castors and swivel castors including brake mechanisms
- nylon or rubber-coated wheels for soft and hard floors

### Vice cabinet

- can be fitted with any desired vice
- can easily be folded away beneath the workbench

Ordering information see LISTA Compendium

### Power unit and drawer cabinets

- prepared for the installation of the power and air supply by the customer at the workstation

Ordering information see LISTA Compendium

## Dimensions

### Distances between supports with 2 or 3 workbench leg assemblies, with or without storage shelf

# Loads

## Workbench tops

Max surface loads of the tops. These specifications apply with evenly distributed loads and static applications.

➤ Superstructures and accessories see p. 110

The maximum load is 400 kg for the fixed workbench leg assembly and 200 kg for the workbench leg assembly with castors with evenly distributed loads and static applications. The load specifications apply to model **1**, for model **2** load specifications (see tables below) must be halved.

➤ Desk chairs see p. 132–135

## + Various materials and surfaces

### Multiplex top

- made of steamed beech veneers glued, is waterproof and has bevelled edges
- sanded, oiled and waxed surface
- versatile, splash-proof, dirt-repellent and largely impervious to oil and grease

### Beechwood top

- made of glued steamed beech beams, waterproof and with bevelled edges
- sanded, oiled and waxed surface
- extremely resilient, splash-proof, dirt-repellent and largely impervious to oil and grease

### Urphen top

- scratch-resistant UV coating
- Top layer made of pressure-resistant, durable urphen
- dirt-repellent and largely impervious to grease and oils

### Resin top

- easy-to-clean structured surface with a 0.8 mm resin coating
- Resistant to common household chemicals, solvents, weak acids and alkalis
- High impact and scratch resistance

### Nitrile top

- technical coating of natural rubber
- with 4 mm rubber top mat
- medium-hard, slip-resistant and shock-absorbing as well as oil and to a large extent fuel-resistant
- can be used at temperatures ranging from -10°C to +70°C

### Metal coatings

- for high usage
- easy to clean and versatile
- choice of sendzimir galvanised coating and chrome steel coating

### Threaded inserts, pre-assembled

- Assembly of preconfigured workbenches simplified by threaded inserts (pre-assembled)
- Fastening of all components possible

**When assembling preconfigured workbenches, additional fastening materials and threaded inserts (preassembled) must be ordered for each component.**

## Order preconfigured models

Pages 89–91

Page 110

1. Select workbench

2. Substructure accessories

3. Superstructures and accessories

## ... or configure and order workbenches individually

Pages 92–96

Page 110

1. Workbench top

2. Top accessories

3. Substructures and accessories

4. Superstructures and accessories

- Select size and material of workbench top
- 5 different materials with various dimensions are available

- Select worktop accessories
- Select from items such as rear panels and side panels, storage shelves, fastening material and pre-assemblies

- Select the substructure
- You can select from workbench leg assemblies and drawer cabinets in various sizes
- Selecting the substructure includes a choice of the required locking system (for cabinets) and colour

- Select the superstructures for the workbench
- Customise your workbench with support pillars, appliance rails, lighting, rear panels, shelves and much more

\* These workbench examples are fitted with size 27 × 27 E drawer cabinets. Each workbench is also available with drawer cabinets in sizes:

18 × 27 E = 306 × 459 mm (W × D)  
 36 × 27 E = 612 × 459 mm (W × D)

**Workbenches**

With Multiplex top, including pre-assembly and fastening material. Drawer cabinet can be fitted on either the right or the left.

Multiplex top thickness **40 mm**  
 Workbench leg height 800 / 850 mm  
 Drawer cabinet width 564 mm  
 Drawer cabinet depth 572 mm  
 Drawer load capacity 75 kg

For load specifications see p. 87

**Universal superstructures**

Workbenches, compact or system workbenches, individual, team or testing and inspection workstations – the compatible, modular superstructure system is unique due to its flexibility and the variety of ways it can be put together.

## Multiplex and beech tops

Excluding pre-assembly and fastening material. These must be ordered additionally depending on the substructure (see below). Rear panel height 150 mm, rear panel thickness 20 mm. Rear panel in Multiplex.

## Urphen tops

Available in 3 colours (see right). Excluding pre-assembly and fastening material. These must be ordered additionally depending on the substructure (see below). Rear panel height 150 mm, rear panel thickness 20 mm. Rear panel in Multiplex.

## Resin tops, light grey

With 2 mm grey PVC edging on all sides. Laminate colour: light grey, NCS S 1500-N. Excluding pre-assembly and fastening material. These must be ordered additionally depending on the substructure (see below).

## Nitrile tops, black, with beech veneer edging

Resistant to: good resistance to oil, good or limited resistance to fuel, not recommended for acids, alkalis or acetone\*\*. Changes to the surface and slight swelling of the surface caused by using chemicals, oils, soaps, etc. may occur; these are a material property and not a product defect. Excluding threaded inserts (pre-assembled) and fastening material. These must be ordered additionally depending on the substructure (see below).

**! \*\* The recommendations on resistance materials are general indicators and do not take into account secondary factors such as concentration of the agent, temperature, oxidation, etc. The information given is therefore not binding. Depending on the substances involved, it is strongly recommended to seek clarification in advance and to carry out a chemical compatibility test.**

## Colour selection for urphen tops

Workbench top for use in many fields; combines functionality with exceptional design. Tops available in 3 colours. When ordering, please use the desired three-digit colour code (instead of .XXX).

**Note:** due to the printing process, these colour samples may vary from the original colours.

## Fastening material and threaded inserts (pre-assembled) for workbench tops

The respective threaded inserts (pre-assembled)/fastening materials must be ordered for each substructure. Minimum top thickness for M10 pre-assembly 35 mm.

3000	3000***	89.815.000

\*\*\* 2 x 1500 mm, adjoining edges

### Side panels

The side panels are supplied screwed onto the worktop. Fastening material included. Specification: Multiplex, 150 mm high, thickness 20 mm, oiled.

For top thickness mm	Depth mm	Art. no.
700	720	89.817.000
750	770	89.818.000
800	820	89.819.000

### Shelves with raised sides

Specification: MDF worktop with 8 mm raised beech sides and back. Depth 300 mm, thickness 19 mm. Max. supported load 20 kg per linear metre. Colourless coating on all sides, without brackets (see below). Max. distance between supports 1100 mm.

For top thickness mm	required brackets	Art. no.
1500	2	44.043.000
2000	3	44.044.000
2500	3	44.045.000
3000	4	44.046.000

### Brackets, height-adjustable

Enable the shelves with raised sides to be adjusted to four different heights. Adjustment height relative to worktop 230, 270, 310 and 350 mm. They are fixed in place through the workbench top (pre-assembly required, see p. 88). Including fastening material. Specification: made from steel box section, including fastening material for each unit. Colour: light grey, RAL 7035.

Description	Depth mm	Art. no.
Brackets, height-adjustable	280	44.047.000
Pre-assembly per bracket (please specify position)	-	39.208.000

## Workbench legs, stationary, fixed height and height-adjustable

The LISTA workbench leg assembly is a rugged steel construction, welded together with extruded profiles, with holes for fastening the top. The feet can be anchored to the floor through a hole in the base plate. Load capacity 400 kg. Please note the maximum clear width on page 86. Specification: sheet steel. Colour: as per colour chart.

Height mm	For top depth mm	Width mm	Depth mm	Art. no.

\* Height-adjustable in 25 mm increments.

## Levelling plates

For height compensation. For precise alignment, even on uneven floors. Description: PVC. Colour: grey. Dimensions: 90 × 90 mm (W × D)

Thickness mm	Art. no.
1	<b>338.146.000</b>
2	<b>338.147.000</b>
4	<b>304.309.000</b>

## Levelling foot

1 × levelling foot, ø 50 mm, adjustment range 45–90 mm. Including fastening material.

Two levelling feet are required per workbench leg assembly.

Description: plastic, black.

Art. no.

**345.040.000**

## ! Workbench leg assemblies, mobile and height-adjustable

Option to select nylon or rubber coated wheels, depending on the properties of the floor. Width: 80 mm. Depth: 725 mm. Height: 700–1050 mm. Please note the maximum clear width on page 74. Specification: sheet steel. Colour: as per colour chart.

Specification	kg 	Wheel Ø mm	Art. no.

# Workbenches | electrically height-adjustable

The electrically height-adjustable workbenches are ideal for demanding environments where work is carried out sitting and standing. The electrical height adjustment enables adaptation of the workstation to different tasks or users.

## Universal superstructures

The modular system – for universal use with all LISTA workbenches and workstation systems. The compatible superstructure system stands out in terms of ease of integration.

➤ Universal superstructures see p. 110

## Workbenches, electrically height-adjustable

Table substructure can be electrically adjusted to any height. The control unit can be mounted on the left or right (on the right as standard). **Without connecting cable.** The table legs are provided with levelling screws. The table legs are connected with a crossbar and screwed to the workbench top. Capacity: max. 400 kg with evenly distributed load. Colour: table legs in aluminium, colourless anodised, legs and crossbar: sheet steel.

<b>GB</b>	3,0 m	<b>89.492.000</b>

## Multiplex top

**Thickness 40 mm.** Made of steamed beech veneers glued in multiple layers, waterproof, with bevelled edges and sanded, oiled and waxed surface. The top is splash-proof, dirt-repellent and largely impervious to oil and grease.

## Beechwood top

**Thickness 50 mm.** Made of glued steamed beech beams, waterproof, with bevelled edges and a sanded, oiled and waxed surface. The top is splash-proof, dirt-repellent and largely impervious to oil and grease.

The space-saving hexagonal workbenches with vices are ideal as group workstations, especially for training centres. Every workstation has a large worktop and a drawer cabinet as sub-structure. The power outlets are integrated into the centre section.

### Hexagonal workbenches

With Multiplex top and 6 drawer cabinets, including pre-assembly and fastening material.

Multiplex top thickness	40 mm
Height of drawer cabinet	800 mm
Drawer cabinet width	564 mm
Drawer cabinet depth	725 mm
Drawer load capacity	75 kg

Vice cabinet on request.

### „Gressel“ vice system

Forward-opening vice with off-centre design enables vertical clamping of up to 4 inch round stock. With protected square guide, for maintenance-free precision. Unlimited applications thanks to the patented 90° swivelling clamp. Anvil and saddle aids enable optimum machining of pipes and other work pieces. Specification: spheroidal graphite iron, with two exchangeable hewn jaws, fastening material included. Colour: stationary elements dust grey, RAL 7037, movable elements cobalt blue, RAL 5013.

# Compact workbenches

- + Utmost stability**  
housing can be loaded with up to 1.0 t.,  
all connections welded
- + Space-saving and well-organised storage**  
in variable substructures with smooth-running drawers  
with 75 kg supported load and a wide range of  
partition material
- + Secure locking system**  
with KEY Lock locking system for simultaneous  
protection of all drawers and doors against  
unauthorised access
- + Great design diversity**  
thanks to the wide range of components,  
substructures, materials and surfaces
- + Easy to use and highly ergonomic**  
with height-adjustable workbench legs for  
optimum working heights and leg room – also  
available for our modular superstructure system
- + Easily adaptable to  
new working environments**  
through flexible integration and reconfiguration  
of the modular system
- >> Universal superstructures**  
see p. 110

**Compact workbenches made by LISTA provide versatile, modern workstations for production, workshop and hobby use.** Their robust design and high-quality materials make them especially durable and able to withstand even severe conditions. Various substructures ensure that there is plenty of storage space.

Art. no. **64.127.220**

Multiplex top thickness	40 mm
Beech top thickness	50 mm
Height of workbench substructure	800 mm
Depth of housing/ worktop	695 / 700 mm
Drawer load capacity	75 kg
Shelf load capacity	50 kg

**Note**

Preconfigured workbenches are equipped with various types of locks. Other worktop specifications (Urphen, chrome steel coating) on request.

**Universal superstructures**

The modular system – for universal use with all LISTA workbenches and workstation systems. The compatible superstructure system stands out in terms of ease of integration. Only compatible when mounting on table top.

Universal superstructures see p. 110

**High load capacity up to 1.0 t**

The sturdy construction and high-quality materials provide a stable system. Can therefore handle total loads of up to 1.0 t without any problems.

For colour information see fold-out page. When ordering, please use the desired three-digit colour code (instead of XXX).

# System workbenches

**LISTA system workbenches give you a stable and affordable solution for workstations in workshops and production areas.** These practical solutions not only impress with their robust design and quality but also offer outstanding value for money.

- + Utmost stability**  
housing has a load capacity of up to 1.0 t with strong construction components
- + Space-saving and well-organised storage**  
in variable substructures with smooth-running drawers with up to 70 kg supported load and a wide range of partition material
- + Secure locking system**  
with KEY Lock locking system for simultaneous protection of all drawers and doors against unauthorised access
- + Fully mobile**  
can be equipped with rubber castors for mobile use in a variety of workplaces
- >> Universal superstructures**  
see p. 110

\* Note usable height of the drawer depending on the goods to be stored.

**System workbenches**

With Multiplex top and housing.  
 Multiplex top thickness **40 mm**  
 Height of housing **680 mm**  
 Clear width of housing **600 mm**  
 Height of workbench leg assemblies **120 mm**

All mobile system workbenches are also equipped with 1 push handle, 4 castor holders with 2 fixed and 2 swivel castors with brakes (solid rubber Ø 100 mm)  
 Height of castor holders including castors **137 mm**  
 Load capacity **400 kg**

**Note:** Preconfigured workbenches are equipped with various types of locks. Other worktop specifications on request.

**Universal superstructures**

The modular system – for universal use with all LISTA workbenches and workstation systems. The compatible superstructure system stands out in terms of ease of integration.

**Note**  
 Only compatible when mounting on table top.

Universal superstructures see p. 110

**Note**  
 Internal drawer height lower than drawer front. For partition material height see p. 210–213.  
 Partition material sets without clip-on label holder.

# Individual workstations

**LISTA's workstation system range offers an all-in-one solution for optimising workstations and workflows.** Regardless of whether it's an individual table, multiple workstations or a team environment: the seamless integration of components turns simple workstations into functional system solutions for optimum ergonomics and cost-effectiveness.

## + Utmost stability

frames with a load capacity of up to 300 kg, durable resin or Multiplex worktops

## + Easy to use and highly ergonomic

thanks to table frame with infinitely (mechanically or electrically) adjustable height from 730 mm to 1130 mm and programmable control for storing table heights

## + Space-saving and well-organised storage

in freely combinable and configurable LISTA drawer cabinets

## + Perfect cable management

thanks to crossbars with integrated cable duct

## + Fully mobile

when fitted with rubber or nylon castors for mobile use

## >> Universal superstructures

see p. 110

## >> Desk chairs

see p. 132–135

## >> General benefits of the LISTA drawer cabinets

see p. 20/21

## + Benefits of ergonomic workstation design

➤ Desk chairs see p. 132 – 135

- Simplified workflows resulting in quality improvements and a reduction in error rates
- 20% increased efficiency
- Increased performance potential and reduced processing times
- Healthier work environment and cost reduction in the long term thanks to fewer disruptions

### Mobility – humans as a standard

Assembly workstations should be fundamentally designed for sitting as well as standing positions. If alternating between sitting and standing positions is not possible, a sitting position is preferable.

### Optimum reach area

Based on average human body dimensions, there are four access zones on the table worktop with different priorities:

Optimum arrangement of grab containers in zone 2 and 3 right beside the workpiece

- 1 The working centre:**  
Both hands work in the direct field of vision
- 2 Extended working centre:**  
Both hands reach all areas of this zone
- 3 One-hand zone:**  
Parts and tools are within easy reach of one hand
- 4 Extended one-hand zone:**  
Outermost usable zone

### Lighting

Good lighting helps to reduce error rates caused by overstrained eyes. Employee performance and production quality rise. The required light intensity must be adapted to the assembly activities.

# Individual workstations

## Table frames height-adjustable

### With locking screws

Table legs height-adjustable using locking screws. The legs are equipped with levelling screws. A steel frame joins the legs and supports the worktop (suitable for worktop depths of 620–800 mm). Load capacity: max. 300 kg with evenly distributed load. Steel structure, painted. Colour: as per colour chart.

### With hand crank

Table substructure can be mechanically adjusted to any height, with hand crank. The hand crank is removable (in the centre as standard). Construction otherwise as above.

### With electric motor

Table substructure can be electrically adjusted to any height. The control unit can be mounted on the left or right (on the right as standard). Without connecting cable. Construction otherwise as above.

### System socket supply cable

Simple and quick electrical installation through plug and socket connector system, 3-pin.

## Height adjustment

A perfect configuration of the system allows for an optimised work process. The height of the LISTA table system can be easily adjusted – by locking screw, hand crank or electric motor – from 730 mm to 1130 mm (dimensions including table top).

## Programmable control system

Is also available as an additional feature for workstations with motor-driven height adjustment. This enables installation heights to be set precisely in advance.

Individual workstations			
Worktop width mm	<b>A</b>	1500	2000

Max. <b>superstructure</b> module widths mm	<b>M</b>	1330	1665

\* Dimension C = Exterior side of support to exterior side of support

### Resin tops

Middle layer made of compressed chipboard, quality grade E1 (DIN 68 761), hard laminate and overlay covering on either side (DIN 68 765 / DIN 53 799). Laminate coating 0.8 mm. 2 mm thick plastic edging on all sides, colour: surface and edges light grey.

### Multiplex tops

Made of steamed beech veneers, glued in multiple layers, waterproof (DIN 68 705), with bevelled edges and sanded, oiled and waxed surface. The top is splash-proof, dirt-repellent and largely impervious to oil and grease.

### Drawer cabinets hanging

The cabinets are mounted to the table frame with a bracket (mandatory, see below).

➤ Other drawer cabinets 18 × 27 E, also in mobile model see p. 26 ff.

### Bracket

Bracket 18 × 27 E for fastening the drawer cabinets to either the left or the right of the table frame. Specification: sheet steel. Colour: as per colour chart.

### i Universal superstructures

The modular system – for universal use with all LISTA workbenches and workstation systems. The compatible superstructure system stands out in terms of ease of integration.

➤ Universal superstructures see p. 110

➤ Storage container see p. 130

➤ Keyhole hook see p. 131

# Team workstations

**LISTA team workstations make an important contribution to workflow management.** The flexible team workstation system allows material to flow between the individual workstations or for a continuous-flow production system from the first component right through to packaging. The modular system combined with basic and add-on units enable many assembly lines to be created, and these can be modified and expanded again at any time with no great effort.

## + Maximum flexibility

thanks to basic and add-on frames in two heights and three widths, double-sided, for standing in a row

## + Easy to use and highly ergonomic

through attachable and inclinable worktop supports with additional height-adjustable table supports for ergonomically correct working heights and our modular superstructure system

## + Easy assembly

through support pillar profiles perforated on four sides so that worktops, connection components and superstructures can be attached at height increments of 50 mm largely without the use of tools

## + Optimum material flow

with linking elements such as support rollers, roller bars and route-changing add-ons for customising the linkage, even on more than one level

## + Easily adaptable to new working environments

through flexible integration and reconfiguration of the modular system

## >> Universal superstructures

see p. 110

**Corner joints**

Allow flexibility in design and planning when linking additional material flows or work areas.

**Roller tracks**

Consist of galvanised rollers. Can be variably subdivided in 25 mm increments.

**Roller bars**

Any track width between 300 mm and 400 mm can be selected for the roller bars.

**Anti-tilt mechanism**

Locks the workpiece holder precisely into the desired mounting position.

**T-connector**

Enables the connection of pre-assembly stations or sorting into testing stations.

**Corner joints**

Interior and exterior corners enable workpiece carriers and containers to be turned 90° to the correct mounting direction.

**End stops**

End stops are an easy and effective way of securing product holders and containers at the end of the roller tracks.

# Assembly trolleys

**LISTA assembly trolleys optimise material flow between individual workstations, warehouse and dispatch.** They enable fast transportation and interim storage of components or assemblies without requiring a lot of space and by combining various elements, they can be adapted specifically to individual requirements.

## + Utmost stability

total load capacity up to 250 kg, integrated storage shelf

## + Great design diversity and mobility

can be assembled on one side or on both sides, stationary or mobile

## + Ergonomic and safe handling

with four swivel castors and push handle

## + Easy assembly

through support pillar profiles perforated on four sides so that rear panels, swivel shelves and adjustable shelves and container strips can be attached at height increments of 50 mm largely without the use of tools

## >> Universal superstructures

see p. 110

➤ Keyhole hook  
see p. 131

➤ Storage container  
see p. 130

### Easy assembly

- swivel and adjustable shelves and container strips can be attached to the support pillar without the use of tools
- ribbed mats and raised sides provide the required stability for the stored items

### Ergonomic handling

- with four swivel castors and push handle
- two locking mechanisms for fixing

## 1 Mobile assembly stand

The assembly trolleys can have elements attached on both sides. The support pillars enable rear panels, swivel shelves or adjustable shelves as well as container strips to be mounted without the use of screws. The assembly trolleys are equipped with 4 swivel castors, 2 of which have braking mechanisms. Wheel diameter 100 mm, rubber, grey, max. load capacity 250 kg. Specification: Assembly stand comprising crossbars, shelves and support pillars, made of steel profile, perforated on four sides at 50 mm increments. Colour: as per colour chart. Roller housing made of galvanised and chrome-plated sheet steel.

## 2 Push handle for assembly trolley

The push handle is fixed to the side of the support pillar of the assembly stand; includes fastening material. Specification: aluminium tubing, black, anodised, with plastic holder. Colour: black, RAL 9005.

## 3 Ribbed mat, double-sided

Specification: rubber, colour: grey.

## 4 Perforated rear panels

The support pillars can be vertically fitted with rear panels, either partially or up to their full height. All rear panels can be attached to the support pillars without screws. Rear panels perforated with square holes 10 × 10 mm, 38 mm division and slots 380 mm apart for accommodating storage shelves and can holders (see page XX). Specification: sheet steel. Colour: as per colour chart.

## 5 Container strips

To hold size 2, 3 and 4 storage containers; can be attached to the support pillars without screws. Max. load capacity 15 kg. Specification: sheet steel. Colour: as per colour chart.

## 6 Safety bracket for container strips for assembly trolley

Safety bracket for container strips. For retrofitting. Is attached to the container strip to prevent any open-ended containers detaching from the container fixing strip in case of uneven flooring. Fastening material included. Specification: sheet steel. Colour: as per colour chart.

## 7 Adjustable shelves, plain, with side panel for assembly trolley

The raised sides prevent the transported goods slipping out in case of uneven floors. The adjustable shelves can be attached with the stop bar on either the front or the rear. Using two brackets, the adjustable shelves are attached to the support pillars without screws, either horizontally or with an inclination angle of 15°. Load capacity 50 kg. Normal level 25 mm + 17 mm stop bar. Including two brackets and a safety catch each. Specification: sheet steel. Colour: as per colour chart.

## i Safety instructions

Due to a risk of toppling, only adjustable shelves with a maximum depth of 300 mm or swivelling shelves may be used.

# Universal superstructures

**+ Utmost stability**  
load capacities up to 150 kg

**+ Tremendous design diversity**  
through a wide range of add-on elements  
including power supply and lighting

**+ Fully modular**  
through standardised dimensions for all LISTA  
workbench and workstation systems, customisable  
configuration options in terms of height and freely  
positionable superstructure widths

**+ Easy assembly**  
on workbench top, workbench substructures  
and individual workstations with support pillars  
perforated on four sides so that add-on elements  
can be attached largely without the use of screws

**With the modular LISTA superstructure system, entire working environments can be planned, assembled and perfectly coordinated in every detail.** On the basis of support pillars perforated on four sides, the system offers you a wide range of add-on elements such as container strips, adjustable shelves, etc. It is also very easy to integrate power supply and lighting so that you always have an ergonomic and scalable solution that is suited to the requirements of the individual workstation and which makes workflows in the workshop and production department even more efficient.

## + Wide range of add-on elements

### 1 Container strips

for attaching storage containers and TFT monitors, horizontally or adjustable up to an angle of inclination of 15°

### 2 Adjustable shelves

load capacity up to 50 kg, can be attached and adjusted horizontally or at a 15° angle, with a stop bar on one side, for mounting to the front or rear

### 3 Rear panels

either plain or with square and slotted perforations for tool holders and rear panel equipment such as can holders or storage shelves

**4 Swivel shelves** load capacity up to 50 kg, can be infinitely adjusted from horizontal to an angle of 30° by means of a clamping lever

### 5 Swivel arms

for holding TFT monitors and module frames for fitting with any desired components

### 6 Equipment rails

load capacity up to 15 kg, depth adjustable and for use across the entire width of the table

### 7 Freely configurable power conduits

can be attached as desired to one or both sides of the worktop or to the support pillar superstructure

### 8 Preconfigured power and compressed air strips

for mounting on the side of the support pillar

### 9 Energy efficient and glare-free workplace lighting

for mounting on the equipment rails and lighting tracks

## + Easy assembly

### Support pillars as a base

- box section steel perforated on four sides so that add-on elements can be attached
- available in various standard lengths
- can be mounted on the workbench top or on the crossbars of the individual workstations

### Add-ons can mostly be attached without the need for tools

- horizontal or tilted at an angle of up to 15°
- in increments of 50 mm

## + Power supply and lighting

### Power conduits with freely selectable power modules

- can be fitted individually on both sides with fuses, switches, sockets, emergency stop buttons, a network or built-in compressed air installations
- globally approved
- retrofitting or refitting with standardised plug and socket connections is possible at any time
- components can be mounted either flush with the worktop, flush with the support pillar superstructure or in front of the support pillar superstructure

### Efficient workstation lighting

- LED technology, neutral white 5000 K, for optimal workstation illumination
- Fitted with GST-18 system connector for simple and smart connection of the system lighting
- The workstation and side lighting can be dimmed via an On/Off switch for effortless working

## + The system concept

The LISTA superstructure system is based on a support pillar perforated on four sides which is mounted either on the surface of the worktop or on the table substructure. This enables a variety of different superstructure widths to be freely positioned and combined with one another. The individual components such as adjustable shelves, swivel arms, etc. can now be attached to the support pillars mostly without the need for tools and freely combined with one another. And this goes for every LISTA substructure from the workbench to the assembly trolley.

## Superstructures on workbench substructures

### Support pillars on the workbench substructure

## Support pillar for mounting on workbench substructure

The support pillars are available in 3 heights. Capacity 150 kg. For mounting purposes, a pair of support rails is required. Including pillar bracket and fastening material. Description: steel profile, perforated on four sides in increments of 50 mm for attaching the superstructure components with minimum use of screws. For double workstations, the same support pillars are used for both sides. Colour: according to colour chart.

Pillar height mm	Art. no.
1100	89.120.XXX
1700	89.121.XXX
2000	89.122.XXX

## Pair of support rails for mounting on workbench substructure

The pair of support rails are available in six widths. For mounting on the rail holding clamp. Including fastening material. Description: sheet steel. Colour: according to colour chart.

<b>W</b> mm	Art. no.

1500	89.124.XXX
2000	89.125.XXX
2500	89.126.XXX
3000 (2 x 1500)	89.127.XXX

## Rail holding clamp for mounting on workbench substructure

One size for all combinations according to rail holding clamp matrix (see page 113). The rail holding clamp can be attached to either the pre-drilled holes on the cabinet and/or the workbench leg assembly. For electrically height-adjustable workbenches, the appropriate rail holding clamp must be attached to the table legs, including fastening material. Description: sheet steel. Colour: according to colour chart.

For mounting on	Art. no.
Drawer cabinet	89.128.XXX
Workbench leg assembly	89.129.XXX
Workbench top	89.130.XXX
Table leg (electrically height-adjustable workbench)	89.136.XXX

## Cover profiles

Matching cover profiles fill the gap between the countertop and support pillar for workbenches (planning information, see page 113). Including fastening material. Description: sheet steel. Colour: according to colour chart.

	2500	50	40/50	89.336.XXX

## Support pillars for mounting onto workbench tops

The support pillars are available in four different heights and must be screwed directly onto the top surface (by the customer) using the fastening material provided. Load capacity 100 kg. Fastening material included. Specification: Steel profile, perforated on four sides in increments of 50 mm, for attaching the superstructure components with minimum use of screws. Colour: as per colour chart. Minimum Top thickness 40 mm. Only suitable for mounting on workbench tops made from beechwood and Multiplex.

Mounting position on worktop	Pillar height mm

\* When loaded to capacity, a support bracket is mandatory (see below).

### Support bracket for support pillar on worktop

To provide additional stability for the support pillars on the workbench top. For pillar heights of 1400 mm absolutely essential. Specification: sheet steel. Colour: as per colour chart.

Specification	Art. no.
<b>Left</b>	<b>89.433.XXX</b>
<b>Right</b>	<b>89.434.XXX</b>

### Support pillars for mounting onto single workstations

The support pillars are available in two different heights and are mounted onto the crossbars of the frame using the fastening material provided. Load capacity 150 kg. Specification: Steel profile, perforated on four sides in increments of 50 mm, for attaching the superstructure components with minimum use of screws. With double workstations, the same support pillars are used for both sides. Colour: as per colour chart.

Height of support pillars from the upper edge of the table top mm	Nominal height mm	Art. no.
<b>350</b>	985	<b>65.128.XXX</b>
<b>1050</b>	1685	<b>65.129.XXX</b>

### Support pillars for wall mounting

For mounting rear panels, adjustable shelves and container strips directly to the wall. Fastening material included. Specification: Steel U-profile, increments of 50 mm, sinkhole for wall mounting every 200 mm on concrete wall (nylon wall plugs No. 8 and countersunk screw 5 x 70). Colour: as per colour chart. Swivel shelves cannot be attached to wall-mounted rails.

mm	Width mm	Depth mm	Art. no.
<b>350</b>	30	40	<b>89.435.XXX</b>
<b>700</b>	30	40	<b>89.436.XXX</b>

<b>1500</b>	30	30	900	<b>89.446.XXX</b>
<b>2000</b>	30	30	1500	<b>89.447.XXX</b>

Without hook-in set and carriage; these must be ordered additionally.

### Component rail suspension set

Suspension set for fixing the component rail to the brackets. Specification: bright galvanised finish.

Description	Art. no.
<b>Suspension set, 1 unit</b>	<b>89.449.000</b>

### Carriage for component rails

Carriage for accommodating cable winches and tools. With four high-quality ball bearings including two end stops for restricting the travel path. Load capacity 5 kg. Screw fixtures included. Specification: Steel structure, bright galvanised finish.

Description	Art. no.
<b>Carriage including two end stops for restricting the travel path</b>	<b>89.452.000</b>

## Perforated rear plain or panels

The support pillars can be vertically fitted with rear panels, either partially or up to their full height. All rear panels can be attached to the support pillars without screws. Rear panels perforated with square holes 10 × 10 mm, 38 mm division and slots 380 mm apart for accommodating storage shelves and can holders (see p. 118 – 119). Specification: sheet steel. Colour: as per colour chart.

## Container strips

To hold size 2, 3 and 4 storage containers; can be attached to the support pillars without screws. Max. load capacity 15 kg. Specification: sheet steel. Colour: as per colour chart.

## Adjustable shelves, plain or slotted

The adjustable shelves are fitted with a stop bar on one of their longitudinal sides. The adjustable shelves can be attached with the stop bar on either the front or the rear. For adjustable shelves, slotted: slots 15 mm apart for partitioning with dividers. Using two brackets, the adjustable shelves are attached to the support pillars without screws, either horizontally or with an inclination angle of 15°. Load capacity 50 kg. Normal level 25 mm + 17 mm stop bar. Including two brackets each. Specification: sheet steel. Colour: as per colour chart.

## Swivel arm attachments

For accommodating the swivel arm elements directly on the table frame (individual workstation) or on the support pillar. Table frame holder galvanised. Specification: steel. Colour: light grey, RAL 7035.

Fixing to	Width mm	Height mm	Depth mm	kg	Art. no.
<b>Table frame</b>	30	280	30	25	<b>65.244.000</b>
<b>Support pillar</b>	30	105	123	25	<b>65.346.000</b>

## Swivel arm

Double-jointed swivel arms with 1 axis and 1 swivel arm add-on. The swivel arm add-ons are fitted with internal slide bearings. The swivel radius is 300 mm. Specification: steel. Colour: light grey, RAL 7035. Without swivel arm fixing device.

Specification	Length mm	kg	Art. no.
<b>Double-jointed swivel arm</b>	2 × 300	25	<b>65.347.000</b>

## Module frames for swivel arm

Welded steel tube frame with perforations on four sides. Perforations at 50 mm increments, with steel axis for fixing onto the swivel arm. Load capacity 25 kg. Specification: sheet steel. Colour: light grey, RAL 7035.

Version with	Width mm	Height mm	Depth mm	Art. no.

### Keyboard support for TFT monitor mount

For mounting onto the monitor mount for swivel arm. Specification: sheet steel. Colour: light grey, RAL 7035.

Specification	Width mm	Depth mm	Height mm	Art. no.
<b>Keyboard support</b>	500	200	115	<b>65.357.000</b>

The LED lighting and power supply system from LISTA meets the high requirements for modern and ergonomic workstations. The combined lamps and power strips make simple workstations functional system solutions for maximum ergonomics and cost-effectiveness. Good lighting and a tidy workstation are essential for high-quality, accurate work.

**+ Tremendous design diversity** provided by LED workstation, side and swing arm lamps with easy mounting on equipment rails, support pillars, rear panels or workbench tops

**+ Maximum ease of use and ergonomics** infinitely dimmable for adjustable brightness

**+ Full modularity** for individual configuration and combination of lamps and power strips using the GST-18 connector system

### Preconfigured power conduits

Consisting of the basic frame and the fitted cover plate on the front (module types see right). The power conduits are fitted with another cover plate at the rear. Specification: sheet steel. Colour: as per colour chart.

**+** Fastening material set and supply cables (see below)

### Cover strip

Ensures that the base frame is flush fitting on the top.

### Fastening sets

For mounting the power conduits. One pair for each set, including screw fittings. Specification: sheet steel. Colours: as per colour chart.

### System socket supply cable

Simple and quick electrical installation through plug and socket connector system, 3-pin.

### Compressed air strip for support pillar

Compressed air strip for support pillar, with 2 compressed air boxes, inside diameter 7.2, and one coupling plug in the end cap. Including fastening material for support pillar. Specification: sheet steel. Colour: light grey, RAL 7035.

## Test and inspection workstations

With its modular test and inspection workstations, LISTA offers optimised solutions for modern quality assurance practices. A variety of different test stations can be assembled from our wide selection of components in order to meet your individual needs and fulfil the most demanding requirements. You can be assured of one thing: system-based quality.

**+ Utmost stability**  
through high-quality welded sheet steel construction

**+ Great design diversity and modularity**  
for individual configuration and combination of top-mounted monitor cabinets with drawer and hardware cabinets

**+ Secure locking system**  
with roller shutters, drawers, monitor doors and hinged doors to protect expensive hardware and important documents

**+ Fully mobile**  
for mobile version

**+ User-friendly**  
thanks to lockable keyboard drawer with full extension runner for keyboard and mouse

**+ Perfect cable management**  
through cable conduits and openings for horizontal and vertical cable ducts

**+ Optionally with lighting, power strip and ventilator**  
for an optimum working environment

**» Benefits of LISTA drawer cabinets**  
see p. 20/21

# Test and inspection workstations | preconfigured

## Computer cabinet

- 1 Monitor stand
- 2 Hardware cabinet
- 3 Pair of castor holders

Art no. **17.616.020**  
Light grey, RAL 7035  
(including push bar)

## Computer cabinets

Computers and the corresponding hardware and software must be protected from dust, dirt and unauthorised access on the shop floor. The LISTA computer cabinet provides a safe and proven solution that fulfils this requirement. Equipped with:

- 1 monitor compartment with retracting door or hinged door mounted on the right, each with cylinder lock,
- 1 plain adjustable shelf in the monitor compartment with retracting door,
- 1 lockable 75 mm keyboard drawer with full extension runner,
- 1 hardware cabinet with hinged doors including lock, permanently installed power supply consisting of a 4-socket power strip (230 V) with illuminated switch, equipment extension, plain adjustable shelf,
- 1 built-in fan,
- 1 connecting cable, 5 m long,
- 1 opening in the rear panel, with removable cover
- 1 push rod (for mobile version)

### Computer cabinets with retracting doors

Stationary and mobile version:  
with mobile versions, nylon castors, Ø 100 mm,  
monitor door can be swung upward,  
monitor compartment usable dimensions  
(W × D × H): 650 × 620 × 605 mm,  
size of viewing window (W × H): 445 × 525 mm

### Computer cabinets with hinged door mounted on the right

Stationary and mobile version:  
with mobile versions, nylon castors, Ø 100 mm,  
Monitor door mounted on the right,  
monitor compartment usable dimensions  
(W × D × H): 600 × 317 × 618 mm,  
size of viewing window (W × H): 635 × 621 mm

## Computer cabinets

Computer cabinets protect electronic equipment in dusty and dirty surroundings. A central power input facilitates power supply to the hardware.

## Quality Stations

Specification depending on model with the following system modules:

### Quality cabinet

With plastic roller shutters including cylinder lock, connection cable 3 m long, hard laminate top as working surface, fitted without tools, power supply with 2-socket and 3-socket power outlet and rocker switch for the lamp built into the housing cover

### Hardware cabinet

With hinged doors including lock, permanently installed power supply consisting of a 4-socket power strip (230 V) with illuminated switch, equipment extension, connecting cable 5 m long, lockable 75 mm keyboard drawer with full extension runner

### Drawer cabinet

With full extension runner, drawer load capacity 75 kg

### Support base

With privacy screen

## Mobility

All test and inspection workstations are also available in a mobile version. This allows you to quickly and efficiently adapt to changing requirements.

# Storage containers and keyhole hooks

Storage containers and keyhole hooks not only keep workbenches and workstations neat and tidy, they also ensure that tools and accessories are neatly stored and always within reach on assembly trolleys and when they are used as accessories in full storage walls and shelving systems. You bet.

## Great design diversity

wide selection of keyhole hooks for efficient and orderly storage of tools, storage containers in a variety of colours and sizes

## Fast and easy assembly

by simply hooking onto any perforated rear panel or placing in containers

## Robust design

keyhole hooks made from steel, storage containers from durable polyethylene (PE)

## Clear labelling

of the storage containers through integrated labelling system

## Storage container

Width, depth and height refer to the external dimensions. The storage containers are resistant to most oils, acids and alkalis, reduce noise when used on conveyors and when used properly are resistant to temperatures of -20°C to +100°C. Specification: polypropylene.

# Desk chairs

**Desk chairs from LISTA provide perfect seating and standing solutions for versatile use in production, at electronic workstations or in the laboratory.** All chairs are manufactured according to the industry work chair standard DIN 68877, taking into account all major ergonomic findings in industrial medicine. The robust design and hard-wearing materials make the chairs very durable, ensure the required hygiene and are easy to clean. With functions such as ergonomically adaptable adjustment, these chairs are the perfect workstation seating solution.

**+ Utmost stability**  
Sturdy base with resilient, robust and non-slip seats

**+ User-friendly and ergonomic**  
thanks to simple adjustment functions such as stepless seat and backrest height adjustment, seat tilt adjustment and weight regulation

**+ Tremendous design diversity**  
thanks to different surfaces, materials and selectable bases with casters or abrasion-resistant sliders

**A good desk chair increases the efficiency of your company and ensures safety in the workplace**

free-floating backrest, height and tilt-adjustable

Adapts to different types of work when sitting

Prevents the risk of entrapment or crushing

height-adjustable seat

additional slip-resistant step-up rail for chairs with an adjustable seat height of over 650 mm

no casters for chairs with a seat height of over 650 mm (except for seat-stop casters)

Base with minimum five support points and safety against tilting

Art. no. **69.505.000**  
with casters, made of integral foam

Art. no. **69.500.000**  
with sliders, made of beech

Art. no. **69.509.000**  
with sliders and height-adjustable base ring, made of imitation leather

**Swivel chair**

Perfect entry-level model for correct posture in production. Low profile, sturdy five-star base made of plastic, in black, either with load-dependent braked casters for hard floors or abrasion-resistant floor sliders. Available in the following versions: laminated beech, black Imitation leather and black integral foam.

Cabinet systems

# THE PERFECT COMPLEMENT

The extensive range of LISTA cabinets enables you to customise and add to your workspace and storage equipment. The high-quality steel cabinets can be easily integrated into a variety of working environments and individually adapted to your specific requirements. They are suitable both for industrial purposes and for storing files and similar items in offices and administrative departments. And of course your personal belongings are always kept safe in a LISTA cabinet.

The right solution for every need

**Hinged door cabinets**  
see p. 138

**Sliding-door cabinets**  
see p. 144

**Wall-mounted cabinets with hinged or sliding doors**  
see p. 150

**Roller shutter cabinets**  
see p. 152

**Vertical pull-out cabinets**  
see p. 154

**Heavy-duty cabinets**  
see p. 156

**Clothing lockers**  
see p. 160

**Compartment cabinets**  
see p. 164

**Battery charging cabinets**  
see p. 166

**Environmental and oil cabinets**  
see p. 172

**Containers and large-capacity cabinets, fire service and office cabinets\***

\*see LISTA Compendium

**LISTA hinged door cabinets provide secure and orderly storage for a variety of items.** All cabinets can be configured individually and adapted to your specific storage needs through the flexible use of partition materials and cabinet accessories.

### **!** ALWAYS WITH LISTA

#### **Choice of colours**

12 standard colours, all other colours available; see p. 12

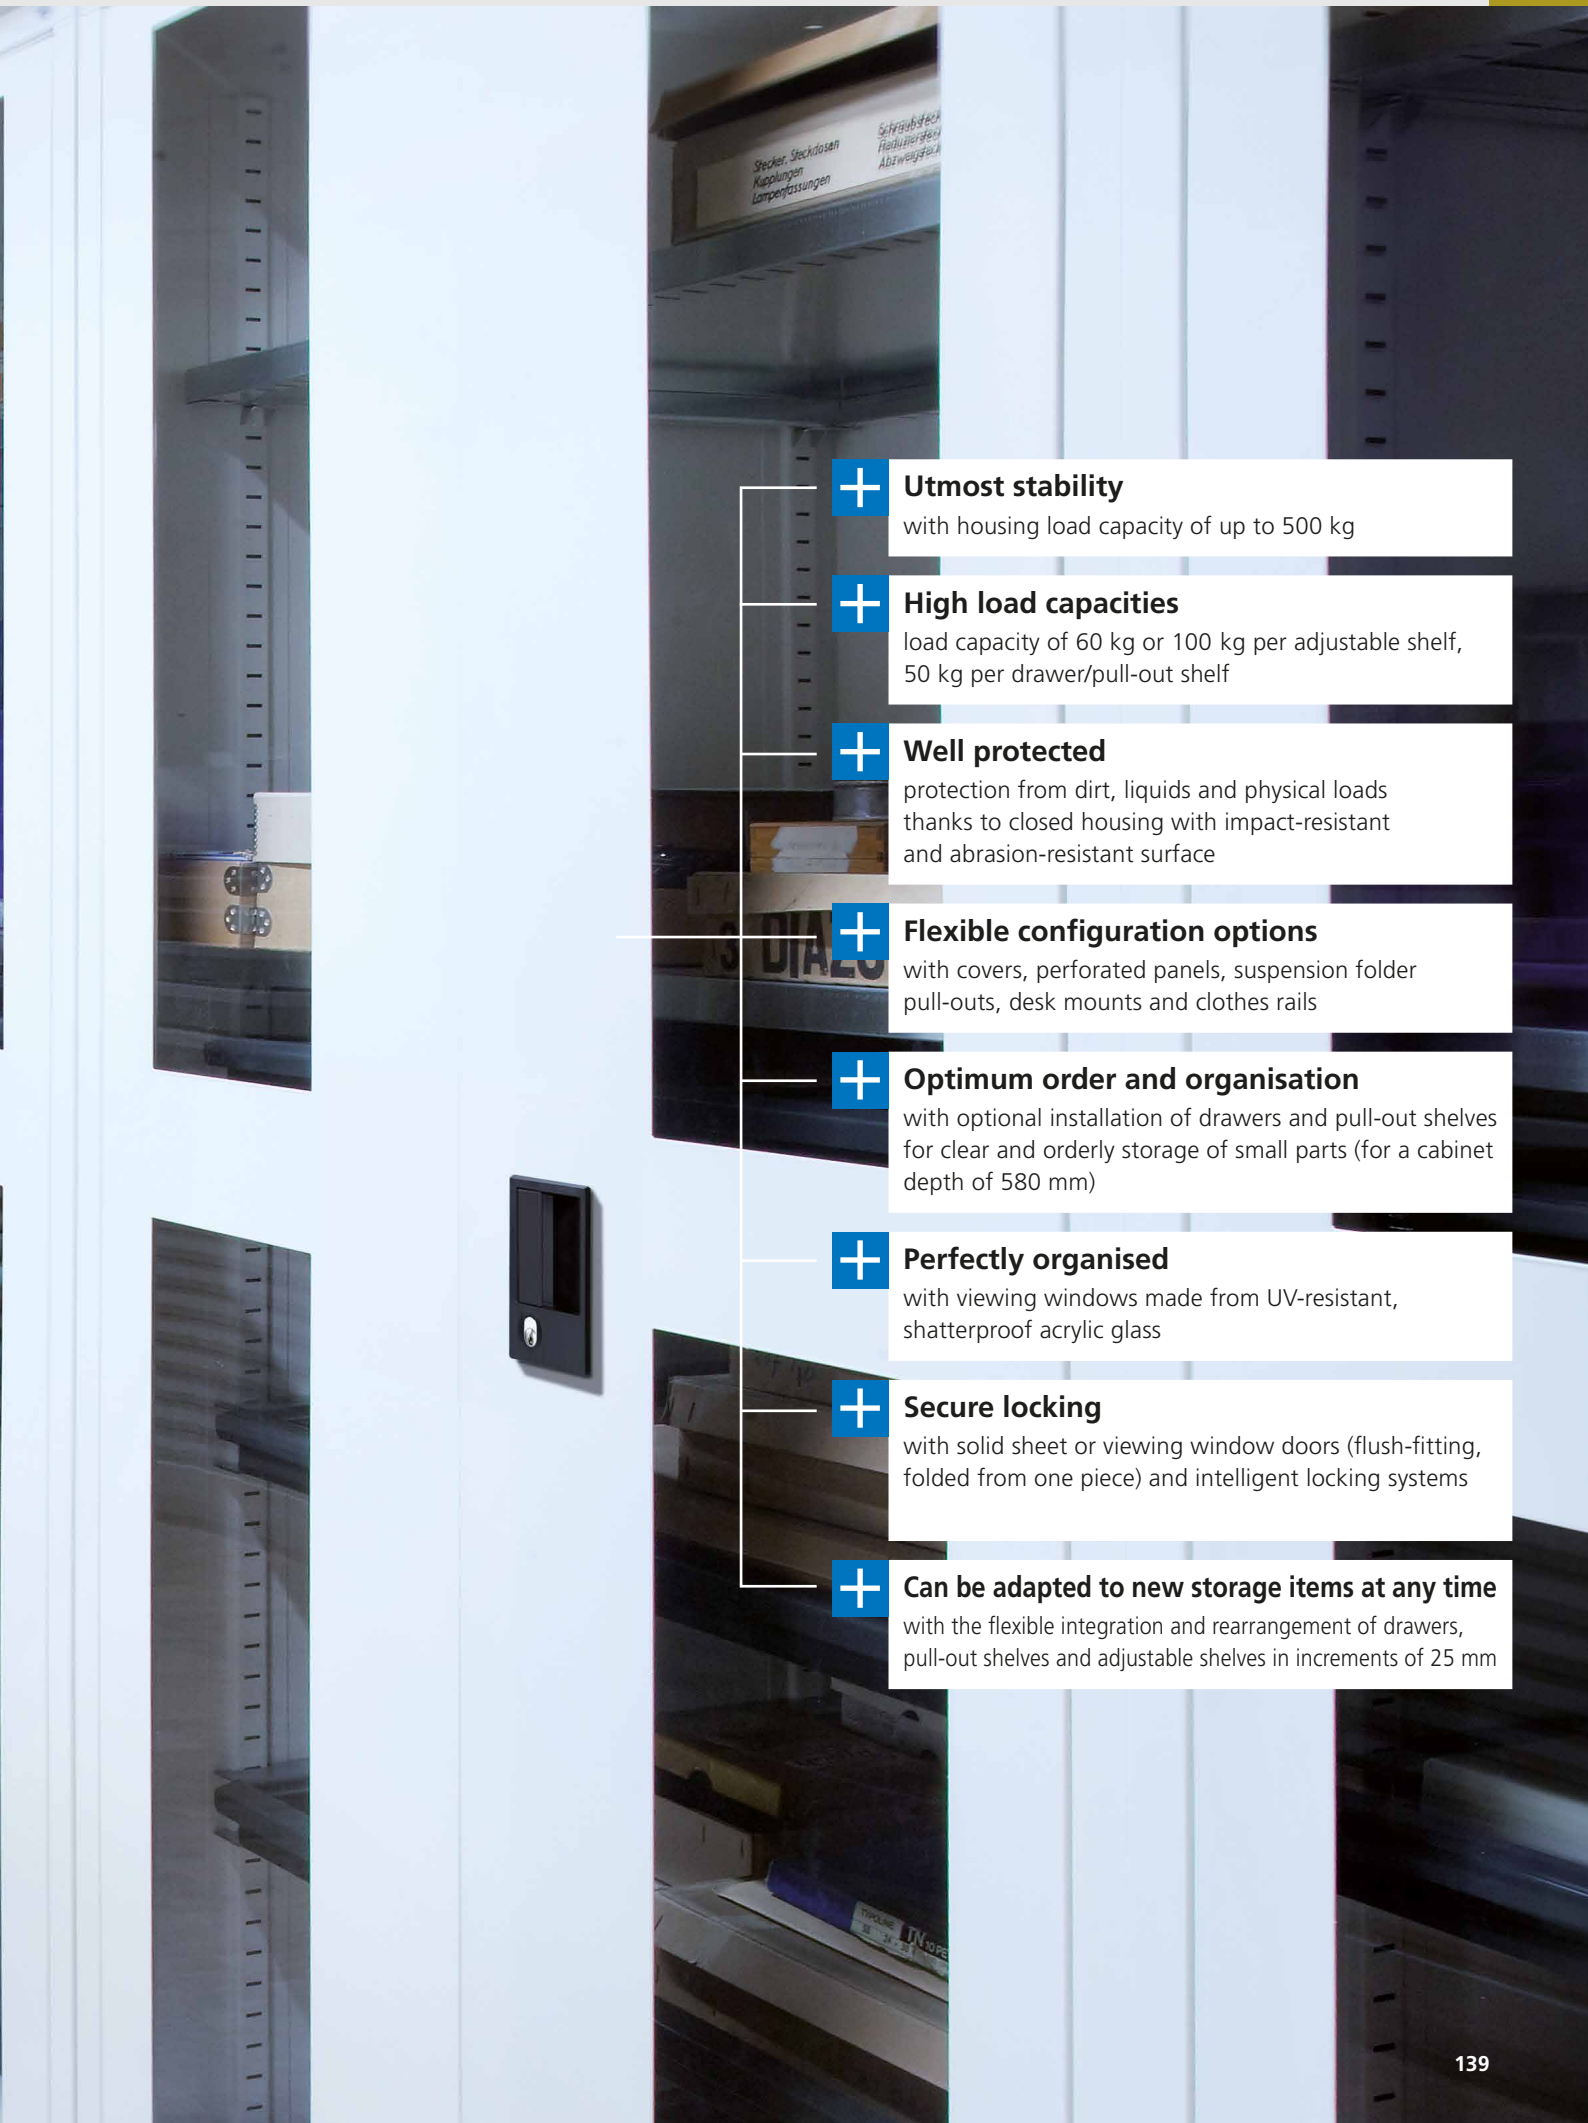

#### **Intelligent locking systems**

Replaceable cylinders which can be fitted to existing locking systems, electronic numeric and remote locking systems via RFID Lock for absolute security made to measure; see p. 13

#### **Individual configuration options**

in size, equipment, locking system, colour and drawer partitions; see p. 10

- + Utmost stability**  
with housing load capacity of up to 500 kg
- + High load capacities**  
load capacity of 60 kg or 100 kg per adjustable shelf, 50 kg per drawer/pull-out shelf
- + Well protected**  
protection from dirt, liquids and physical loads thanks to closed housing with impact-resistant and abrasion-resistant surface
- + Flexible configuration options**  
with covers, perforated panels, suspension folder pull-outs, desk mounts and clothes rails
- + Optimum order and organisation**  
with optional installation of drawers and pull-out shelves for clear and orderly storage of small parts (for a cabinet depth of 580 mm)
- + Perfectly organised**  
with viewing windows made from UV-resistant, shatterproof acrylic glass
- + Secure locking**  
with solid sheet or viewing window doors (flush-fitting, folded from one piece) and intelligent locking systems
- + Can be adapted to new storage items at any time**  
with the flexible integration and rearrangement of drawers, pull-out shelves and adjustable shelves in increments of 25 mm

## Hinged door cabinets

Depending on the model, the cabinets on these two pages are equipped with: adjustable shelves, galvanised, 30 mm thick, load capacity 60 kg. Pull-out shelves and drawers, painted, anthracite grey, RAL 7016, load capacity 50 kg

Partition material sets excluding clip-on label holder.  
For partition material and labelling system see p. 204 ff.

**When space is limited, sliding-door cabinets from LISTA are the ideal solution for your storage items.** Because the smooth-running doors remain in the housing and do not jut out into the traffic area.

**+ Utmost stability**

thanks to housing with a load capacity of 500 to 950 kg (as from a width of 1500 mm)

**+ Perfectly smooth running**

since the sliding doors are equipped with high-quality, smooth-running and quiet runners

**>> Benefits of LISTA cabinet systems**

### i Suitable labels for partition material

The practical clip-on label holders are fitted directly onto the metal separators.

Labelling system see p. 220

**Note:** the front height corresponds to the drawer front height. For the actual height of the partition material see p. 218–221. Partition material sets excluding clip-on label holder.

**+ Utmost stability**  
thanks to housing with load capacity of 25 to 50 kg

**+ Optimum order and organisation**  
thanks to perforated rear panel or insert shelves with load capacities of up to 25 kg for neat and tidy storage of tools, files and other equipment

**+ User-friendly**  
since the stored items are easy to reach and at viewing height

**>> Benefits of LISTA cabinet systems**  
see p. 136

**LISTA wall-mounted cabinets are perfect as additional storage space for small parts, documents and more.** They keep your storage items ergonomically and conveniently stored at viewing height. Just mount them on the wall and in no time everything is just where it should be: neatly put away.

Art. no. **57.089.070**  
Sliding doors, ruby red,  
RAL 3003

**Wall-mounted cabinets:**

Hinged doors, flush-fitting, folded from one piece, with pin hinges, opening angle 115°. Sliding doors, folded from one piece; the ball bearing rollers of the doors run quietly on the guide rails. Insert shelf: galvanised, 20 mm thick, for cabinet 800 mm high without perforated rear panel;

the insert shelf is fitted by means of spot-welded angle brackets (not height adjustable). Base height: 35 mm, base closed from below. Cabinets with perforated rear panel for using pegboard hooks (see p. 131), with square holes 10 x 10 mm, 38 mm apart.

**Clasp lock KEY Lock**

- standard locking system for hinged doors with replaceable cylinders
- makes it easy to adapt to existing locking systems.

**Lock-down cylinder lock / KEY Lock**

- locking system for sliding doors
- cannot be prised out thanks to the right-angled bar.

**Extremely smooth running**

- the ball bearing rollers of the sliding doors run quietly on the guide rails

**Perforated rear panel**

- enable flexible attachment of stored items thanks to a wide range of hooks.

For pegboard hooks see p. 131.

## Cabinet systems | roller shutter cabinets

**Lista roller shutter cabinets give you full access to your stored items even in confined spaces.** And the individual configuration and equipment options mean that they are right for a wide variety of workplaces from workshop to office.

### + Utmost stability

with housing load capacity of up to 500 kg

### + Secure locking

thanks to the smooth-running roller shutters with user-friendly push handle and integrated cylinder lock with replaceable cylinders (other locking systems on request)

### + User-friendly

roller shutter stops at any height without the need for catches

### » Benefits of LISTA cabinet systems

see p. 136

**Roller shutter cabinets**

Depending on the model, the cabinets on this page are fitted with: adjustable shelves, galvanised, 30 mm thick, load capacity 60 or 100 kg, pull-out shelves and drawers, painted, anthracite grey, RAL 7016, load capacity 50 kg, roller shutter in PVC, colour similar to light grey, RAL 7035

Art. no. **58.401.010**  
Light blue, RAL 5012

**Direct access to all stored items**

The smooth-running roller shutter which can be operated with one hand stops at any height without the need for catches.

**LISTA heavy-duty cabinets are perfect for storing heavy materials on adjustable shelves, pull-out shelves and in drawers.** Additionally, all common access protection solutions, from retracting doors and hinged doors to vertical roller shutters, can be used. For greater transparency of stored items, doors can be supplied with viewing windows on request.

- + Utmost stability**  
with a housing load capacity of up to 1500 kg
- + High load capacities**  
160 kg per adjustable shelf, 200 kg per drawer/  
pull-out shelf
- + Outstanding safety features** – with single  
drawer blocking mechanism for heavy-duty cabinets with  
retracting doors to prevent the cabinet from tipping over
- + User-friendly**  
because of the fast access to all stored items –  
retracting doors or smooth-running roller shutters with  
user-friendly push handle
- + Secure locking**  
with retracting doors, hinged doors or roller shutter  
and intelligent locking systems
- + Well protected**  
protection from dirt, liquids and physical loads thanks  
to closed housing with impact-resistant and abrasion-  
resistant surface
- + Perfectly organised**  
with viewing windows made from UV-resistant,  
shatterproof acrylic glass
- + Can be adapted to new storage items at any time**  
with the flexible integration and rearrangement of drawers,  
pull-out shelves and adjustable shelves in increments of 25 mm
- >> Fully compatible with LISTA drawer cabinets  
and drawer storage walls because of the  
standardised unit of measure**  
see p. 20 and/or p. 62

**Clothing lockers from LISTA offer impressive functionality and a wide variety of equipment options.**

This makes them suitable for use in a wide range of locations from workshop to sports hall and they also offer secure, flexible and ideal storage in accordance with DIN 4547-2011.

**+ Utmost stability**

thanks to hinged doors with the pin on the right and with reinforcement pocket for greater protection against burglary (DIN 4547)

**+ Sophisticated ventilation**

with air vents at the top and bottom of the housing

**+ Optimum hygiene**

thanks to plain compartment shelves without raised edge to make it easier to clean the compartments thoroughly

**+ Practical interior fittings**

with hat rack, towel holder and clothes rail with three sliding coat hooks for each compartment

**+ Individual equipment options**

such as housing with an inclined top, double compartments, benches or ventilation ducts for on-site forced ventilation

**+ Secure locking**

with KEY Lock locking system or locking mechanism for padlock (other locking systems on request)

**+ Protection from dirt and corrosion**

with bases or legs that are galvanised in addition to being powder-coated. Protect against corrosion, cover with a base also protects against dirt

COLOURS: With preconfigured cabinets housing in light grey, RAL 7035.

### Inclined top

Clothes lockers with an inclined top prevent undesired use of the cabinet top as shelf space.

Inclined top on request.

### Sophisticated ventilation system

- the air vents located on the top and bottom of the housing ensure permanent circulation of air in the locker
- door models with individual perforation pattern on request

### Air duct

Elimination of odours thanks to high air exchange rate and improved drying through on-site forced ventilation.

Air duct on request.

### Versatile locking systems

cylinder locks, numeric combination locks, coin deposit locks, locking systems for padlocks and master key systems are available. Other locks available on request.

### Clothing lockers

Depending on the department and the model, all double-decker clothes lockers on this page are fitted with:

single-leaf solid sheet door, flush-fitting, surface plain or with perforated field for additional ventilation (1 compartment lockable)

- 1 hat rack
- 1 clothes rail, with 3 sliding coat hooks
- 1 towel holder

**LISTA battery charging cabinets with hinged doors are perfect for the centralised supply of batteries and electrical devices.** All cabinets can be configured individually and adapted to your specific storage needs through the flexible use of partition materials, cabinet accessories and power supply by means of power strips.

### + Flexible range of applications

Charging options for battery-operated electrical machines, BDE devices, notebooks, tablets and smartphones

### + Perfect cable management

Cable openings for protected and orderly cable routing

### + Outstanding safety features

CE compliant

### + Secure locking

Devices are locked away at all times, and are protected against unauthorised use

### >> Benefits of LISTA cabinet systems

See p. 136

### Battery charging cabinets with hinged doors

Depending on the model, the cabinets are equipped with **adjustable shelves**, galvanised, 30 mm thick, load capacity 60 kg. Painted **drawers**, anthracite gray (RAL 7016), load capacity 50 kg. **Power strips** with on/off switches and 4 or 5 sockets, 230 V.

## + Flexible range of applications

Charging options for battery-operated electrical machines, BDE devices, notebooks, tablets, smartphones or e-bikes

## + Sophisticated ventilation

Optimal air circulation thanks to ventilation holes at the front and back

## + Great design diversity

With sockets, network sockets RJ45 and USB interfaces

## + Outstanding safety features

CE compliant

## + Secure locking

Devices are locked away at all times, and are protected against unauthorised use

## >> Benefits of LISTA cabinet systems

See p. 136

**LISTA compartment cabinets with power connection are perfect for personal storage of battery-operated devices of all kinds.** Suitable for use in industry, trade, offices, schools, universities or public buildings. Batteries can be charged during storage thanks to the built-in double sockets, and are therefore always ready to use.

Doors with viewing windows

**LISTA environmental and oil cabinets are suitable for the safe and standard storage of water-hazardous substances in water hazard class (WGK) 1–3.** Liquids that are required in the daily work flow are stored safely in LISTA oil cabinets. Pull-out shelves hold the liquid canisters. Drops of liquid are collected in the drip tray.

- + Maximum stability**  
with housing load capacity of up to 500 kg
- + High load capacities**  
Drip trays with a load capacity of up to 100 kg and canister shelves up to 200 kg
- + Can be adapted to new storage items at any time**  
by inserting or converting drip trays and canister shelves in 25-mm increments as required
- + Individual equipment options**  
with drip trays, canister shelves, base trays, canisters and drawers
- + Safe and orderly storage**  
with drip trays welded to form a liquid-tight seal according to Section 19 of the Water Resources Act/German directive on steel trays (StawAR).
- + Secure locking**  
with solid-sheet doors (flush-fitting, folded from one piece) and selectable locking systems
- + Sophisticated ventilation**  
with perforated field at the top and bottom of environmental lockers

Art. no. **71.461.010**  
Lightblue, RAL 5012

Art. no. **60.474.030**  
Reseda green, RAL 6011

**Observe legal regulations and directives**

The canisters may only be filled with acid- and lye-free liquids (no abrasive media), oils and grease with a flame point above 55° Celsius. Maximum ambient temperature 40° Celsius. Please call us for special applications and further information.

**Note:**  
Not suitable for storage of flammable materials

**Oil cabinets**

The cabinets are fitted with: chromium steel drip trays, 2 mm thick, welded to form a liquid-tight seal according to Section 19 of the Water Resources Act/German directive on steel trays (StawaR), 40-litre capacity, canister shelves (painted grey), NCS 4502-B, canister made of HDPE plastic with outlet valve (glossy chrome finish). Solid-sheet hinged doors folded from one piece, with fulcrum pins, 235-degree opening angle.

**W** → 717 mm    **D** ↗ 753 mm    **H** ↑ 1450 mm

**Cabinets with 2 solid sheet doors**

Equipment	kg	Door storage	Lock	Art.no.
2 canister shelves 8 canisters, 25 l each 1 drip tray Tank dimensions: 651×620×100 mm (W×D×H)	200	Fulcrum pin	KEY Lock	<b>71.460.XXX</b>
3 canister shelves 10 canisters, 10 l each 4 canisters, 25 l each 1 drip tray Tank dimensions: 651×620×100 mm (W×D×H)	200	Fulcrum pin	KEY Lock	<b>71.461.XXX</b>

**i Canister with outlet tap**

Fitted with screw cap. Filter in the filler neck. Outlet tap, glossy chrome finish with seal. Specification: HDPE plastic, transparent.

Width	Depth	Height	Volumetric capacity	Art.no.
120 mm	440 mm	270 mm	10 l	<b>14.990.000</b>
150 mm	440 mm	490 mm	25 l	<b>14.991.000</b>

**Canister shelf**

The canister shelf has a handle on the left and right and a centre lip. It is only 27 E (451 mm) deep so there is enough room in the front area for the canister tap.

**Built-under drainage tray for oil cabinet**

The built-under drainage tray of the oil cabinet has a leak-proof welded construction according to the Water Resources Act Sec. 19/StawaR (German directive on steel trays) and has a test certificate. It has a volumetric capacity of 40 l. **On request.**

**Environmental cabinets**

The cabinets are fitted with: galvanised drip trays, 3 mm thick, welded to form a liquid-tight seal according to Section 19 of the Water Resources Act/German directive on steel trays (StawaR), 20-litre capacity. Solid-sheet hinged doors folded from one piece, with hinges, 115-degree opening angle.

**W** → 1000 mm    **D** ↗ 500 mm    **H** ↑ 1950 mm

**Cabinet with 2 solid sheet doors**

Equipment	kg	Door storage	Lock	Art.no.
4 drip trays Tank dimensions: 982×445×70 mm (W×D×H)	100	Hinge	KEY Lock	<b>60.474.XXX</b>

**Drip trays**

The drip trays feature a leak-proof welded construction according to StawaR (German directive on steel trays) and have a test certificate.

## Shelving Systems

# VERSATILE AND ROBUST

**Whether for files, liquids, equipment or tools: shelving systems from LISTA offer tailor-made storage solutions for practically all requirements.** High load capacities and a distinctly robust design guarantee optimum use of space and high storage capacity. Many shelving systems are now also available in a galvanised version. The more impressive new feature is that the universal shelving system has been completely overhauled to allow even more flexible solutions for a wide variety of working environments.

The right solution for every need

**L1006 universal shelving**  
see p. 176

**Heavy-duty pull-out shelving systems**  
see p. 194

**Drawer storage walls**  
see p. 62

**Sliding shelf units\***

**Storage and sloping shelving systems\***

**Wide span shelving systems\***

**Pallet shelving systems\***

**Cantilever shelving systems\***

**Mobile shelving systems**  
see p. 202

**The impressive feature of the universal shelving system from LISTA is that it is fully modular.**

Available in two versions – either with shelf supports or with open sides – and a variety of heights, depths and unit widths, the slot-in system is quick and easy to assemble for a wide range of requirements. Individual configuration options with shelves, partitions, drawer units and more produce an orderly, space-saving storage system in which everything is ready to hand. Whether small parts, bulk goods, tools or archive material: the LISTA universal shelving system is the ideal warehouse solution – especially in the lean area.

## ! ALWAYS WITH LISTA

### Choice of colours

12 standard colours, all other colours available; see p. 12. Many shelving systems are also available in a galvanised version.

### Intelligent locking systems

Replaceable cylinders which can be adapted to existing locking systems, electronic numeric and remote locking systems via RFID Lock for absolute security made to measure; see p. 13

### Individual configuration options

in size, equipment, locking system, colour and drawer partitions; see p. 10

### Fully combinable

Standardised dimensions for all LISTA universal shelving systems of varying designs; see p. 11

**+ Utmost stability**

Sturdy shelf supports or side panels with a load capacity from 1,000 kg to 2,800 kg per shelving unit

**+ High load capacities**

80 kg to 400 kg per shelf

**+ Generous storage capacity in a small space**

Can also be installed as a double-stack set-up on request

**+ Fast and easy assembly**

Non-screwed, slot-together design of all basic components and shelves simplifies assembly

**+ Flexible configuration options**

Drawers, clothes rails, organisation rails, pull-out suspension file frames, shelf front cover strips, drip trays, grating covers, etc.

**+ Fully modular**

Standardised dimensions for all LISTA universal shelving units and customisable configuration options. The layouts of the shelf supports and side panels can be combined

**+ Can be adapted to new storage items at any time**

Flexible integration and rearrangement of shelves, drawers and individual parts in increments of 25 mm

**+ Secure locking**

Choice of hinged doors or space-saving sliding doors in combination with rear panels

**+ Ideally suited to lean environments**

Perforated rear and side panel covers and sloping shelves for fast, ergonomic access to tools and materials

**+ Maximum shelf use**

Shelves have an edging height of only 25 mm so that the full storage height is available

## + Fully modular and available in a wide range of versions

All individual parts and accessories of the universal shelving system can be freely positioned and combined with one another in a modular fashion – and this applies to both equipment versions (with shelf supports or with side panel).

➤ Dimensions and load capacities, see page 182.

### 1 Shelf supports

Sturdy, open layout with a maximum load per unit of 2,800 kg, optional extension unit for shelving heights up to 5 m.

### 2 Side panel

Elegant closed layout with a maximum load per unit of 1,000 kg also prevents the stored items from falling out

### 3 Side panel cover, plain or perforated

For covering the open shelf supports or the row of slots on the side panels, perforated version for tool hooks

### 4 Diagonal brace

For stabilising the shelving units lengthwise

### 5 Lengthwise braces

Used instead of diagonal braces to make both sides accessible

### 6 Rear panel, plain or perforated

For covering the rear panel of shelving units; also stabilises the units lengthwise, perforated version for tool hooks

### 7 Partition

Placed between the shelf supports

### 8 Grating

Can be used as side panel covers, rear panels and partitions, prevents access and yet guarantees visibility and ventilation

### 9 Base cover

Protects against dust and dirt. Also prevents items from sliding underneath the unit

### 10 Shelf

High compartment loads of 80 to 280 kg (edge height 25 mm) and 400 kg (edge height 39 mm) for maximum use of space, in a choice of plain or slotted

### 11 Sloping shelf LEAN

Retrofittable stop bars for fitting shelves at an incline, for providing ergonomic access to materials and parts

### 12 Partitions and shelf dividers

For subdividing slotted shelves, ideal for storing small parts and small boxes

### 13 Shelf front cover strip

For the neat and tidy storage of bulk goods

### 14 Drawer

Fully extendable with load capacity of 50 kg for space-saving storage of small parts; extensive range of partition material

### 15 Drip tray

For storing liquids and for use as a drip tray

### 16 Pull-out suspension filing frame

Suitable for A4 suspension files; load capacity 50 kg for the orderly storage of and easy access to suspension files

### 17 Centre partition

For the vertical subdivision of complete shelf units

### 18 Clothes rail

Perfect for storing clothing and protective workwear

### 19 Organising rail

For vertical storage, compartment division and for storing ring-shaped materials (cables, vee belts and tubing)

### 20 Hinged and sliding doors

Secure access and dust protection with hinged doors or space-saving sliding doors, lockable

## + Flexible range of applications

The universal shelf unit offers storage solutions for a wide variety of requirements in workshops and offices. Since it takes ergonomic factors into account and implements the 5S principles, it is especially suitable for lean working environments.

### Storage of tools and spare parts

- Perfect order and cleanliness according to the 5S principle

### Storage of boxes and containers

- Ergonomic access to materials at the workplace according to lean criteria

### Storage of bulk goods

- Structured and efficient storage of bulk goods

### Shelf units with sloping shelves

- Ergonomic access to materials at the workplace

### Shelf cabinet system with lockable doors and drawers

- Safekeeping of small parts and tools

### Storage of lever-arch files, folders and suspension files

- Well-organised and within reach

### Clothing locker shelf units

- Storage of clothing and protective workwear

### Double-stack shelving systems

- Optimum use of space

## + Individual configuration options

### Typical configurations

#### L1006 universal shelf unit for the workshop

- Perforated rear panel for holding tool hooks
- Drawers for safekeeping of small parts
- Shelf front cover strips for tidy storage of loose bulk goods
- Organising rail for storing cables and tubing

## Configure and order L1006 universal shelving individually

Shelf unit floor area

- Choice of shelf dimensions  $W \times D$  (e.g.:  $1000 \times 500$  mm)
- To calculate the external dimension, please refer to the planning instructions on p. 182/183

1. Layout and shelving height

- Choice of «shelf supports» or «side panel» layout – combinations are possible!
- Choice of shelving height  $H$
- Optional: shelf support cover, extension units, side panel covers and partitions, floor anchoring, levelling plates

2. Stabilising elements

- Choice of stabilising elements: diagonal braces, rear panels or lengthwise braces

**L1006 universal shelf unit for the office**

- Elegant, closed side panel
- Pull-out suspension filing frame for orderly, easily accessible suspension files
- Partitions for orderly storage of and easy access to files and folders
- Shelves with an edging height of only 25 mm so that the full height of a file is available

**NEW!**  
Shelf heights 1,100mm, 1,450 mm and 1,800 mm for 3, 4 or 5 file heights

**3. Shelves**

- Choice of shelves (plain, slotted) and compartment load
- Optional: Stop bars for sloping shelves, shelf labelling, partitions and dividers

**4. Accessories**

- Optional: Choice of accessory shelf front cover strips, drawers, partition material, drip trays, clothes rails, Cover panels, etc.

**5. Front-mounting fitments**

- Optional: Hinged and sliding doors

**6. Add-on elements «Office»**

- Optional: sideboard, side panel covers

# Shelving systems | Universal shelf unit L1006, shelf support layout

## Dimensions and load capacities

**kg** Max. load per unit 2,800 kg with a distance between shelves of max. 750 mm

**kg** Max. compartment load: 80, 160, 220, 280, 400 kg

Adjustment increment: 25 mm

## Planning instructions

### Calculating the external dimensions

Overall width of shelving: Total shelving widths + number of supports × 40 mm + 10 mm (base plate external)

Overall depth of shelving: Shelf depth + 4 mm

### Safety instructions

**Anchoring rule** Units with a depth to height ratio greater than 1:5 (1:4 for units with hinged doors and single units with drawers) must be anchored. Floor anchoring: Art. no. **130.555.000** (each).

**Arrangement of diagonal braces** For each basic unit and for each third add-on unit, an extra diagonal brace is required. Instead of diagonal braces, rear panels can be used – or lengthwise braces in order to make the unit accessible from both sides. Diagonal brace: Art. no. **50.026.000**.

## Basic and add-on shelf units

### Basic unit

2 pairs of shelf supports incl.  
6 horizontal braces  
1 diagonal brace, galvanised  
5-6 shelves, slotted (thickness 25 mm)

### Add-on unit

1 pair of shelf supports, incl.  
3 horizontal braces  
5-6 shelves, slotted (thickness 25 mm)

## Dimensions and load capacities

- Max. load per unit 1,000 kg
- Max. compartment load: 80, 160, 220, 280 kg
- Adjustment increment: 25 mm

## Planning instructions

### Calculating the external dimensions

Overall width of shelving: Total shelf widths + 50 mm (base plate external)  
Overall depth of shelving: Shelf depth + 36 mm

### Max. base and extension section per shelving unit

Shelf spacing (mm)	150	300	450	600	max. 750
Permissible section load with diagonales or longitudinal connectors (kg)	max. 800	max. 770	max. 750	max. 710	max. 680
Permissible section load with rear panels (kg)	max. 1050	max. 1000	max. 950	max. 900	max. 850

**!** The load data apply only for uniformly distributed load!  
Please observe the safety instructions on pages 182.

## Basic and add-on shelf units

### Compartment load 80 or 160 kg, galvanised or painted

**Basic unit**  
2 solid sheet side panels  
1 diagonal brace, galvanised  
4-7 shelves, plain (thickness 25 mm)

**Add-on unit**  
1 solid sheet side panel  
4-7 shelves, plain (thickness 25 mm)

**Basic unit**  
2 solid sheet side panels  
1 rear panel, plain (2-part)  
4-7 shelves, plain (thickness 25 mm)

**Add-on unit**  
1 solid sheet side panel  
1 rear panel, plain (2-part)  
4-7 shelves, plain (thickness 25 mm)

**Basic unit**  
2 solid sheet side panels  
1 rear panel, plain (2-part)  
1 hinged door, lockable  
6-7 shelves, plain (thickness 25 mm)

**Add-on unit**  
1 solid sheet side panel  
1 rear panel, plain (2-part)  
1 hinged door, lockable  
6-7 shelves, plain (thickness 25 mm)

**Basic unit**  
2 solid sheet side panels  
1 rear panel, plain (2-part)  
7 drawers (3 × 100, 4 × 150 mm)  
4 shelves, plain (thickness 25 mm)

**Add-on unit**  
1 solid sheet side panel  
1 rear panel, plain (2-part)  
7 drawers (3 × 100, 4 × 150 mm)  
4 shelves, plain (thickness 25 mm)

	50.481.000	50.482.000	50.483.000

#### Floor anchoring

Please follow the assembly instructions provided. For single shelf units, 2 per side panel or 2 per pair of shelf supports.

Floor anchor Art. no. 130.555.000  
M8 × 75, each

**!** Please observe the safety instructions on pages 182.

## Side panel cover, plain or perforated

Add-on panel for covering the shelf supports or the rows of slots in the solid sheet side panels. Can be attached left or right. For perforated side panel cover: 10 × 10 mm square holes and 38 mm divisions for holding keyhole hooks (see page 117). Specification: Steel sheet, 2-part for height 3000 mm (1000 + 2000 mm). Colour: As per colour chart or galvanised.

Dimensions (W) mm		3	3	3	3	3	3

## Base covers

Protects against dust and dirt. The base covers rest on the base plates and are hooked into the shelf supports or side panels by shelf supports. Including fastening material.

Specification: Steel sheet.  
Colour: Black.

		850	1000	1300
		Art. no.	Art. no.	Art. no.
W → H ↑	25 mm	50.432.060	50.433.060	50.434.060

## 2 Diagonal brace

For stabilising the shelving units lengthwise. Fastening material included. Specification: Steel, galvanised.

### Diagonal brace arrangement:

For each basic unit and for every third add-on unit, an extra diagonal brace is required.

Diagonal brace	Art. no.
for height 1100–1450 mm	45.655.000
for height 1800–2500 mm	50.026.000
for height 3000 mm	45.844.000

or...

## Lengthwise braces

Instead of diagonal braces, lengthwise braces (at the top and bottom) can be used in order to make the unit accessible from both sides.

Including fastening material.

Specification: Steel sheet.

Colour: As per colour chart or galvanised.

or...

## Rear panels, plain or perforated

The rear panel cover for shelving sections also stabilises the units lengthwise and is screwed to the shelf supports or side panels.

For perforated rear panel: Specification: 10 × 10 mm square holes and 38 mm divisions for holding keyhole hooks (see page 131). Including fastening material.

Specification: 2-part, sheet steel.

Colour: As per colour chart or galvanised.

## Rear grating

Rear grating filling for shelf units. The rear gratings are screwed to the shelf supports or side panels. Including fastening material. Specification: Steel wire 3.0 mm.

Mesh size 50 × 50 mm, galvanised, blue chromated according to DIN 50961.

**!** To stabilise the shelving systems lengthwise, diagonal or lengthwise braces must be used in addition to the perforated rear panel.

**!** Rear panel link piece is absolutely essential for all rear panels used in combination with shelf supports. Basic unit: 2 × width 80 mm and for each add-on unit 1 × width 120 mm. Specification: Steel sheet. Colour: As per colour chart or galvanised.

version

For shelf supports, per pair, height 185 mm

### Cover panel, resin-coated, thickness 22 mm

Surface and edging light grey, NCS S 1500-N, laminated chipboard (quality class E1), with melamine coating on both sides (manufactured according to standard EN 14322). 2 mm thick plastic edging on all sides. Including double-sided adhesive tape.

### Multiplex cover panel, thickness 30 mm

Made of steamed beech veneers, glued in multiple layers and waterproof (DIN 68 705), bevelled edges, sanded, oiled and waxed surface. The panel is splash-proof, dirt-repellent and largely impervious to oil and grease. Including double-sided adhesive tape.

### Side panel covers

Filler panels (left and right) for covering the rows of slots in the side panels and for flush closure with the front triangular edging of the side panels. For left and right mounting. Description: width 21 mm, sheet steel. Colour: according to colour chart or galvanised.

## Shelving systems | heavy-duty pull-out shelving systems

Heavy-duty pull-out shelving systems are ideal for the safe and convenient storage of heavy items such as injection moulds, punching tools, electric motors and pallet goods. Since they can be loaded using lifting gear, they can be installed in a compact arrangement. Load capacities of up to 9000 kg per unit and the availability of different shelving heights, shelf depths and unit widths and the wide selection of equipment options mean that they can be adapted to perfectly suit any type of storage item.

**+ Utmost stability**  
through robust, solid design with a very high load capacity of up to 9 t per shelving unit

**+ Optimum use of space**  
with shelving heights of up to 2.50 m for perfectly organised storage of very heavy inventory items

**+ High load capacities**  
up to 200 kg per top shelf, up to 1000 kg per fixed and pull-out frame

**+ Secure locking**  
with smooth-running roller shutters in combination with side and rear panels

**+ Can be adapted to new storage items at any time** – through the flexible integration and rearrangement of fixed and pull-out frames in increments of 100 mm

**+ Extremely smooth running**  
through smooth-running pull-outs with stops in closed and fully extendable positions

**+ Optimum order and organisation**  
pallets can be stored lengthwise or crosswise in fixed and pull-out frames

**+ Safe and orderly storage**  
flush storage achieved by placing sheet metal covers on top or inserting chipboard inserts

## Dimensions and load capacities

**A** = Shelving depth  
**B** = Shelving height  
**C** = Shelving width

**D** = Minimum distance from floor  
**E** = Minimum distance top edge to top edge

**G** = Number of installation widths + number of side frame widths 80 mm + external base plate widths 60 mm  
 Example:  $G = 3 \times 1090 \text{ mm} + 4 \times 80 \text{ mm} + 2 \times 60 \text{ mm} = 3710 \text{ mm}$   
**K1...K4** = Installation heights

### Lengthwise pallet storage

Pallet type	Width mm	Depth mm	Height mm
I	800	1200	150

### Crosswise pallet storage

Pallet type	Width mm	Depth mm	Height mm
I	800	1200	150
II	1200	800	150
III	1200	1000	150
IIII	1000	800	150

### Shelving depths (A)

<b>D</b> Installed dimensions mm	860	1060	1260
<b>Extension depths (L) mm</b>			
Part extension, 65% extension	510	650	810
Full extension, ~ 100% extension	790	990	1190

### Shelf widths (C)

<b>W</b> Installed dimensions mm	890	1090	1290
Side frame width	80	80	80
Base plate width	200	200	200

### Load capacities

<b>D</b> Installed dimensions mm	860	1060	1260
Number of pull-out frames			
Fixed frame Number			
		Max. load capacity per pull-out or fixed frame	
1 to 5	-	1000	900
1 to 6	-	900	900
1 to 7	-	800	800
1 to 8	-	700	700
1 to 9	-	600	600
-	1 to 9	1000	900
1 to 3	1 to 6	1000	900
1 to 5	1 to 4	800	800
Max. load capacity per top shelf		200	150

The maximum load capacities specified must not be exceeded. The load capacities apply only to an evenly distributed load. The maximum load capacity per shelving unit is 9000 kg. **Only one pull-out frame per shelving unit may be pulled out.**

### Shelving heights (B)

<b>H</b> Nominal dimensions mm	1500	2000	2200	2500
--------------------------------	------	------	------	------

### Installation heights (K)

Top shelf	<b>K1</b>	50 mm
Fixed frame	<b>K2</b>	70 mm
Part extension frame	<b>K3</b>	135 mm
Full extension frame	<b>K4</b>	180 mm

### Vertical installation distances

Distance from floor (D) minimum	105 mm for fixed frame
	165 mm for part extension frame
	215 mm for full extension frame
Minimum distance (E) top edge to top edge	100 mm for fixed frame
	200 mm for full extension and part extension frame
	300 mm for full extension frame with sheet metal cover
Hole spacing	every 100 mm

### Diagonal brace arrangement

the load capacities only apply when, for 6 shelf units or more, 2 shelf units or at least every fifth shelf unit is fitted with rear panels or 1 diagonal brace per 3 units.

### **!** Anchoring rule

Heavy-duty pull-out shelving units must always be anchored.

**+** Optimum use of space for very heavy storage items

**Pallet storage**

■ space-saving pallet storage with a load capacity of up to 1000 kg in fixed frames

**Heavy-duty pull-out shelving systems 9000, disassembled**

With 2 pull-out frames for part extension (PE, 65% extension) and 1 fixed frame as top shelf, each including chipboard inserts, 40 mm thick. Can be fitted with side panels, further pull-out and fixed frames, metal covers, sliding doors, roller shutters and column guard. Basic unit including 1 diagonal brace for lengthwise stability, 2 side frames, floor anchor and levelling plate set. Add-on unit including 1 side frame, floor anchor and levelling plate set. Hole spacing in the side frame every 100 mm. Specification: steel sheet. Colour: as per colour chart.

**Note:** from the third add-on unit, an **additional diagonal brace** is required (see p. 187).

**H** **2000 mm**

		Pull-out frames	Fixed frames	Shelf load kg	Max. load per unit kg	Basic unit Art. no.	Add-on unit Art. no.

**Heavy-duty pull-out shelves up to 1000 kg**

- for storing large, heavy single items and equipment
- flush storage achieved by placing sheet metal covers on top or inserting chipboard inserts

## ! Side frames

Side frames are perforated at intervals of 100 mm to allow installation of top shelves, fixed and pull-out frames. Front and back columns are welded together with horizontal and diagonal braces to form a rigid frame. Specification: sheet steel pressed profiles. Colour: as per colour chart.

**Caution:** four floor anchors are required per side frame.

## Side frame cover

For covering the top of the side frames. Specification: sheet steel. Colour: according to colour chart.

## Side panels

The side panels and the side frame columns are screwed together. The standard side panels are used for the roller shutter structure. Includes screw fixtures. Specification: sheet steel 1.5 mm. Colour: according to colour chart.

## ! Side frame connections

Screwed to the side frames at the front and rear. Including screw fasteners. Specification: flat steel. Colour: as per colour chart.

## ! Diagonal braces

Used instead of rear panels to stabilise units lengthwise. Including screw fasteners. Specification: Steel, galvanised. Number of diagonal braces: see planning notes p. 192.

or...

## ! Rear panels

The rear panel cover for shelving sections also stabilises the units lengthwise and is screwed to the side frames with the columns. Including fastening material. Specification: steel sheet. Colour: as per colour chart.

### ! Floor anchoring

Heavy-duty pull-out shelving units must always be anchored.

### Floor anchor

M10 x 130, each	112.991.000
-----------------	-------------

### Column guard PC6

Safety feature to protect exposed side frames. With 4 holes for floor anchoring. Including 4 segment anchors M12 x 140 mm (drill hole depth 140 mm). Specification: sheet steel, St 37-2. Colour: yellow/black.

### Column guard PC6

W 166 x D 166 x H 322	43.537.000
-----------------------	------------

**!** In order to comply with regulations, and for safety reasons, heavy-duty pull-out units must consist of at least these elements

## ! Fixed frame

Instead of the top shelves, fixed frames can also be used. The fixed frames are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

## Metal sheet covers for fixed frames

Placed on loosely. Locked in place with a bent section at the front and rear and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

## Chipboard inserts for fixed frames

2-piece, to be inserted into the fixed frames. Specification: chipboard, 40 mm thick.

or...

## Pull-out frames for part extension

Part extension (PE), 65% extension. The pull-out stop secures the pull-out frame in both closed and open positions. The runners are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

## Metal sheet covers for pull-out frames (part extension)

With raised edge on 3 sides, 30 mm high, placed on loosely. Locked in place with a bent section at the front and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

## Chipboard inserts for pull-out frames (part extension)

2-piece, to be inserted into the pull-out frames for part extension. Specification: chipboard, 40 mm thick.

**!** In order to comply with regulations, and for safety reasons, heavy-duty pull-out shelving systems must consist of at least these elements.

or...

### Pull-out frames for full extension

Full extension (FE), 100% extension. The pull-out stop secures the pull-out frame in both closed and open positions. The runners are screwed to the side frames. Including screw fasteners. Specification: Pressed profile, welded. Colour: as per colour chart.

### Metal sheet covers for pull-out frames (full extension)

With raised edge on 3 sides, 30 mm high, placed on loosely. Locked in place with a bent section at the front and a stop bracket welded on at the rear. Specification: steel sheet, 2 mm thick. Colour: as per colour chart.

### Chipboard inserts for pull-out frames (full extension)

2-piece, to be inserted into the pull-out frames for full extension. Specification: chipboard, 40 mm thick.

### ! Top Shelves

Cover the top of the side frames and provide protection from dust. Fitting material included. Specification: sheet steel. Colour: according to colour chart.

### Roller shutter including top shelf

Pre-assembled roller shutter housing. Roller shutter guided in vertical profiles on side frame. With recess for lever tumbler lock. For initial assembly, including top shelf, pre-drilled, for attaching the roller shutter housing. Description: roller shutter housing and guide profiles made of sheet steel. Colours: according to colour chart. Roller shutter with plastic slats. Colour: pale grey, RAL 7035. Note: the height of the shelving is increased by 323 mm due to the design.

#### + lever tumbler lock

KEY Lock, Separately lockable	49.090.000
-------------------------------	------------

**A LISTA mobile shelving system is the perfect way to create plenty of storage space in confined areas.** When more space is needed in existing premises, LISTA has the perfect solution: create more space without extending. Fixed shelf units are needed only if simultaneous access to all stored items is necessary; otherwise, aisles between shelf units are simply uneconomical. Instead of many space-consuming service aisles between the fixed shelf units, only one single aisle is needed to provide access to all shelving.

### **A wide variety of equipment options**

with different drives and rail systems

### **Protects against dirt**

through horizontal and vertical dust seals

### **Secure locking option**

Central locking system and linking hook provide protection against unauthorised access

### **Outstanding safety features**

The aisle can be locked during service times; movement of the system is not possible

## + Benefits of LISTA mobile shelf units

### Conventional storage

30 shelving units each providing 6 shelf metres = **180 shelf metres.**

### Storage with mobile shelf units

54 shelving units each providing 6 shelf metres = **324 shelf metres.**

## + Flexible range of applications

LISTA offers suitable storage solutions for all types of stored goods. Universal and drawer storage walls are perfectly suited for use with mobile substructures. LISTA planning specialists utilise the many options offered by the mobile shelf unit system. Every organisation detail is managed according to your requirements – from the design to the turnkey installation of your system.

### Universal shelving L1006 R Design «Solid sheet side panel»

Diagonal braces or rear panels ensure stability. Depending on the dimensions and specification, shelves have a load capacity between 80 and 280 kg. The maximum load-bearing capacity of a shelving unit is about 500 kg.

For more information on universal shelving systems see page 176.

### Universal shelving L1006 Design «shelf supports»

Suitable for bulky or heavy stored goods. They provide optimum air circulation thanks to their open design. Stability is ensured by diagonal braces or rear panels. Depending on their dimensions, the shelves have a load capacity between 80 and 280 kg. Maximum load capacity per shelving unit up to 1000 kg.

For more information on universal shelving systems see page 176.

### Drawer storage walls

The drawer options for small parts or tools are virtually unlimited. The many drawer sizes together with the large range of partition components provide a flexible and adaptable basis for optimum and material-friendly storage.

For more information on drawer storage walls, see page 62.

Partition material

# SYSTEMATIC ORGANISATION

**LISTA drawer partition materials create systematic order for all industries and all requirements.** From small parts to NC tools, our plastic boxes, troughs, metal dividers and more provide flexible solutions for practically any kind of storage item. The results speak for themselves: because systematic organisation means less time searching for stored items, simplified workflows and efficient results.

**+ Wide range of specifications in a modular system**

with preconfigured sets and freely combinable individual elements such as slotted partitions, metal dividers, plastic boxes, troughs, etc.

**+ Fully combinable**

with the entire LISTA range thanks to the standardised unit of measure

**+ Fast and easy assembly**

the walls surrounding the interior of the drawers have a slotted grid and the bottoms of the drawers are perforated for the insertion and attachment of slotted partitions, metal dividers, milling cutter holders and holding pins

**+ Professional labelling**

with LISTA Script labelling software for labels, clip-on label holders and barcode holders

# Drawer partition material

## + One system, many different options

Thanks to the LISTA Unit measuring system, our partition materials can be freely combined and are compatible with the entire LISTA range. This means that you have the ideal storage system for your particular storage items – either as individual parts or as a preconfigured set.

## + The LISTA Unit (E) – the clever measurement system

Using a practical grid system, the LISTA unit (E) ensures that housings, drawers and partition materials always fit neatly together. **A LISTA unit (E) is 17 mm** and is based on the grid system for partitioning drawers. Drawer cabinet housings and the drawers that fit into this housing are based on the same LISTA Units, even though they have different dimensions.

### Determining the right partition material:

1. Determine the drawer size in LISTA Units (E)
2. Determine the dimensions of the set or the individual parts in LISTA Units (E)
3. The sum in Units of the individual parts must not exceed the sum in Units of the drawer(s)

Take the usable height of the drawer into account according to the goods to be stored.

## + Wide range of specifications in a modular system

### Plastic boxes

- perfect for small parts of various sizes
- also available in ESD

### Troughs

- for cylindrical items
- can be divided lengthwise as desired
- also available in ESD

### Slotted partitions and metal dividers

- for flexible partitioning
- for parts of different sizes

### Holding pins and non-slip mats

- ideal for larger items

### Foam inserts with blue underlays

- protects tools and other items and keeps them organised
- hold items firmly in place in the drawer

### NC tool holders

- for neat and orderly storage of NC items

➤ For NC storage and transport systems see p. 78

### LISTA Script

- clip-on label holders for plastic boxes, troughs and metal dividers
- helps you keep an overview of your inventory and can easily be read by a barcode scanner

➤ LISTA Script see p. 224

The LISTA Script labelling software can be downloaded from the Internet:  
[www.lista.com/script](http://www.lista.com/script)

The entire LISTA range is set out in the **Compendium** and online at [www.lista.com](http://www.lista.com)

➤ Non-slip mats and PE foam inserts, see p. 223

**Note**

The front height is the same as the height of the drawer front. For the actual height of the partition material see p. 218–221.

Partition material sets excluding clip-on label holder.

**Correct use of partition material**

Troughs should always be inserted in the running direction of the drawers to prevent round parts, such as drills or similar, from falling out when the drawers are closed forcefully.

# Drawer partition material | Slotted partitions, metal dividers and dividers

## Slotted partitions, both sides

For lengthwise partitioning of drawers in combination with metal dividers.

Specification: Steel sheet, colour: Grey, NCS S 4502-B.

## Metal dividers

Together with the slotted partitions, they can be used to subdivide the drawers as desired.

Specification: Aluminium

## Dividers

For lengthwise and crosswise partitioning of drawers.

Specification: Steel sheet, colour: Grey, NCS S 4502-B.

# Drawer partition material | plastic boxes and troughs

Especially suitable for drawers with a front height of: 50, 75, 100, 125 mm

## How can I partition my LISTA drawer?

Example: Plastic boxes and troughs for drawers 36 × 27 E (612 × 459 mm)

\* The plastic box also has a fixed centre divider.

### Perfect drawer partitioning

Store your small and round parts professionally and perfectly in the LISTA drawers with LISTA plastic boxes and troughs.

The table on the right shows the maximum capacity of your drawer for each size of plastic boxes and troughs. The dimensions are standardised but can be combined if desired and fit into any LISTA drawer.

**Please bear the front height of your drawer in mind (external dimension)!**

#### Maximum capacity per plastic box for:

9 × 9 E  
150 × 150 mm

Number of plastic boxes/troughs

4,5 × 9 E  
75 × 150 mm

Number of plastic boxes

4,5 × 4,5 E  
75 × 75 mm

Number of plastic boxes

### Troughs, standard

Specification

Troughs, 9 × 9 E, 6 pieces  
Dividers, 10 pieces

6 pcs/set  
10 pcs/set

	9 × 9 E (150 × 150 mm)		
	Ø 33 mm, 4 troughs	Ø 45 mm, 3 troughs	Ø 70 mm, 2 troughs
Art. no.			
	80.196.000	80.195.000	80.194.000
	134.044.000	134.040.000	134.020.000

➤ Plastic boxes/troughs also available in ESD.

**N.B.:** Take the usable height of the drawer into account according to the goods to be stored.

### Clip-on label holders for plastic boxes

for inserting into the groove on the plastic boxes. Including labels and transparent sheets.

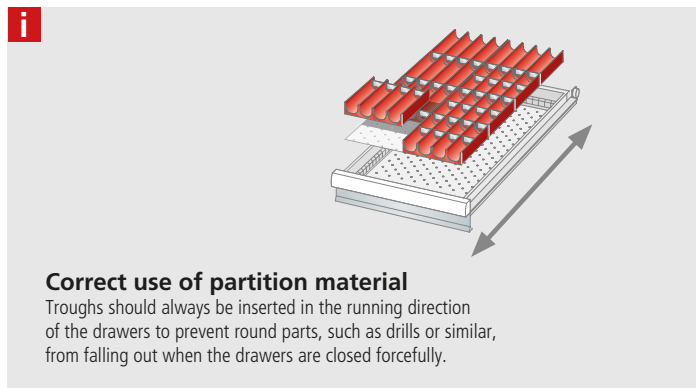

Label size (W × H) mm	Quantity	Art. no.
47 × 12	20 tabs	134.034.000

### Clip-on label holders for dividers

fit directly onto the dividers. Including paper and transparent sheet.

Label size (W × H) mm	Quantity	Art. no.
27 × 12	20 tabs	134.029.000
47 × 12 (Ø 70 mm)	20 tabs	134.049.000

#### Correct use of partition material

Troughs should always be inserted in the running direction of the drawers to prevent round parts, such as drills or similar, from falling out when the drawers are closed forcefully.

### LISTA-Script labels «Standard pack»

The labelling software can be downloaded from the Lista website at [www.lista.com/script](http://www.lista.com/script).

Label size (W × H) mm	Quantity	Art. no.
210 × 22 / 70 × 22	2 sheets	80.325.000
47 × 12	76 labels	
47 × 18	52 labels	
27 × 12	133 labels	

## Pairs of grooved inserts

Consisting of main and secondary components. They are attached by inserting between two slotted partitions. They can be divided by metal separators. Main components slotted for dividing into small compartments or marking with label holders. Specification: ABS plastic. Colour: red. Main component: width 153 mm/9 E, depth 68 mm/4 E. Secondary component: width 153 mm/9 E, depth 34 mm/2 E.

# LISTA Script labelling system

With LISTA Script, your LISTA products can be simply and clearly labelled. The labelling software can be downloaded from our website. The matching labels are supplied as perforated A4 sheets suitable for any commercially available printer. There are almost no limits to the ways you can design labels. As always with LISTA.

**+ Individual labelling**  
with a wide range of labelling options, colours, pictograms and barcode generator

**+ Software can easily be downloaded**  
from [www.lista.com/script](http://www.lista.com/script)

**+ Easy to use**  
with any commercially available printer and pre-perforated labels

**+ Fast data import**  
via database link

## + Easy to use in three simple steps

### 1. Design

- Design the labels using LISTA Script labelling software

### 2. Print

- Print the labels on perforated A4 sheets and detach them in the desired size

### 3. Insert

- Open the viewing window, insert the label and close the viewing window by pressing the bottom edge

## + Pre-perforated labels for cabinets and partition material

LISTA labels are available in the sizes 70 × 22 mm, 140 × 22 mm and 210 × 22 mm for cabinet labelling and 27 × 12 mm, 47 × 12 mm and 47 × 18 mm for labelling partition material.

**Label size 210 × 22 mm**

■ for labelling drawers

**Label size 70 × 22 mm**

■ for labelling housing

**Label size 70 × 22 mm**

■ for labelling drawers

**All labels**

■ on perforated A4 sheets

**Label size 27 × 12 mm**

■ for labelling troughs

**Label size 47 × 12 mm**

■ for labelling plastic boxes

**Label size 47 × 18 mm**

■ for labelling dividers

### LISTA-Script labels «Standard pack»

Label size (W × H) mm							Quantity	Art. no.
210 × 22 / 70 × 22	●	●	-	-	-	-	<b>2 sheets</b>	<b>80.325.000</b>
27 × 12	-	-	●	●	●	●	<b>133 labels</b>	
47 × 12	-	-	-	●	●	●	<b>76 labels</b>	
47 × 18	-	-	-	-	●	-	<b>52 labels</b>	

#### \* Clip-on label holders

To hold clip-on label holders, for fitting into the slots inside the drawer fronts, see partition material p. 218.

### Label strips with and without labels

For labelling shelves, clothes lockers, etc. Specification: plastic, with hinged transparent protector, self-adhesive.

Width mm	labels	Height mm	Max. font height mm	Quantity	Art. no.
105	-	22	14	<b>1</b>	<b>18.926.000</b>

# ADVICE AND PLANNING

**At LISTA, quality of service is paramount. You can depend on that.** Whether for warehouse or workshop, assembly, production, recreation area or office: whatever you want to equip, we are there with comprehensive and professional support from planning to after-sales service.

Are you planning a large-scale project? Then we will be pleased to advise you personally, to work with you to analyse your individual needs and visualise

your new furniture system with the aid of our planning tool LISTA Draw. Installation and maintenance also form part of our service. This means that with LISTA, you can obtain everything from a single source so that you always have the perfect workspace for every challenge, true to our promise: making workspace work.

**Your contacts**  
see p. 200

## + Your individual choice of colour on request

### Benefits

LISTA is able to deliver any individual colour on request. In addition to the existing standard and predefined colours, your desired product can on request be produced in any colour you choose.

- impact-resistant and abrasion-resistant housing finish thanks to environmentally friendly powder coating
- total corrosion protection for drawers thanks to electrophoretic dip painting

## + Maximum flexibility with choice of colours

### 12 standard colours, 6 colour combinations

All colour-variable products are available in 12 standard colours and 6 colour combinations at no extra cost. The three-digit colour code (e.g. **.010**) forms part of the article number. When ordering, always complete the article number by adding the required colour code (e.g. **70.701.010**). Housings and drawers can also be ordered in different colours.

## + The clever measurements system

### LISTA Units (E)

Using a practical grid system, the LISTA unit (E) ensures that housings, drawers and partition materials always fit neatly together. **A LISTA unit (E) is 17 mm** and is based on the grid system for partitioning drawers. Drawer cabinet housings and the drawers that fit into this housing are based on the same LISTA units, even though they have different dimensions.

LISTA Units	Depth 27 E				Depth 36 E							
	18 × 27 E	27 × 27 E	36 × 27 E	54 × 27 E	18 × 36 E	27 × 36 E	36 × 36 E	45 × 36 E	54 × 36 E	64 × 36 E	78 × 36 E	
Cabinet floor area mm	411 × 572	564 × 572	717 × 572	1023 × 572	411 × 725	564 × 725	717 × 725	870 × 725	1023 × 725	1193 × 725	1431 × 725	
Drawer usable surface mm	306 × 459	459 × 459	612 × 459	918 × 459	306 × 612	459 × 612	612 × 612	765 × 612	918 × 612	1088 × 612	1326 × 612

## Locking systems

### KEY Lock

The standard locking system with replaceable cylinders makes it easy to adapt to existing locking systems. The locking system secures all drawers simultaneously.

### CODE Lock

Here the key is replaced by a numeric combination. A simple four to six-digit numeric combination is sufficient to open the drawer cabinets.

### RFID Lock

The LISTA RFID Lock enables automatic and contactless locking through radio frequency identification. It consists of a transponder in the lock and a mobile control unit such as badge or card.

### AUTO Lock

Like RFID Lock, opens and locks automatically however; can also be time-dependent.
